How to use RouteGenie and Paycom at Sol Transportation

A step-by-step guide for new dispatchers, with real screenshots from our own RouteGenie and Paycom accounts (October 2026). Passenger names, addresses, phone numbers and employee names are blurred on purpose.

Click any screenshot to see it full size. Where a rule changes often (crews, vans, slots), ask your lead for the current version.

New here? Read **Start**, then the **Dispatch playbook** (how we make decisions during a shift), then the RouteGenie and Paycom chapters as you need them. Finish with Check yourself.

Coverage procedures (effective October 2026)

Starting October 2026, we use standardized scheduling, pre-assignment and coverage procedures across all transportation accounts. They make sure trips are properly assigned and that coverage problems are found **before** the day of service.

MANDATORY REQUIREMENT

All trips scheduled for pick-up at or before 8:00 AM must be pre-assigned in RouteGenie with confirmed coverage by 7:30 PM the night before service.
This applies to all accounts, including SDVA, LBVA, St. Paul's PACE, Family Health Centers, NCTD and all other programs.

Who does what, and when

ROLE	WHEN	RESPONSIBILITIES
1. Routing dispatcher Schedule preparation	Before **5:30 PM**	• Review the following day's manifest and available resources. • Prepare and submit the next day's driver schedule. • Identify coverage shortages and trips that need additional resources. • Communicate outstanding coverage concerns directly to the pre-assignment dispatcher. • Escalate known coverage shortages to management before ending the shift.
2. Pre-assignment dispatcher	After the schedule is submitted, done by **7:30**	• Review the schedule submitted by the routing dispatcher.

RouteGenie assignments	**PM**	• Pre-assign trips in RouteGenie based on driver availability and vehicle assignments. • Make sure every trip scheduled at or before 8:00 AM has confirmed coverage by 7:30 PM. • Identify and resolve assignment conflicts or coverage shortages. • Notify management immediately if coverage cannot be secured.
3. Outgoing dispatcher Shift handoff	End of shift	• Document unresolved trips, actions taken and management notifications in the EOSR. • Communicate outstanding coverage issues directly to the incoming dispatcher. • Make sure management knows about any unresolved issues before clocking out.
4. Overnight dispatcher Coverage monitoring	Overnight	• Monitor early-morning assignments for driver call-outs, vehicle issues and last-minute changes. • Coordinate replacement coverage when necessary. • Escalate unresolved coverage issues immediately. • Communicate changes to the morning dispatcher.
5. Morning dispatcher Trip execution	Morning	• Verify drivers are available and on their way to their assigned pick-ups. • Monitor early-morning trips for delays or service disruptions. • Address new coverage issues and escalate concerns immediately.

6. Late additions and changes

- Any trip received or changed **after the routing dispatcher has ended their shift** must be reviewed immediately by the dispatcher on duty.
- If coverage cannot be secured, management must be notified immediately. These trips **cannot be left for the morning shift** without proper escalation.

7. Management escalation and client notification

- When coverage cannot be secured, management helps find additional resources or alternative transportation.
- Dispatch coordinates timely notification of the affected client or program whenever service is at risk.

COVERAGE ACCOUNTABILITY

The **routing dispatcher** prepares the schedule and identifies known coverage shortages before 5:30 PM.
Once the schedule is submitted, the **pre-assignment dispatcher** is responsible for assigning and verifying trips in RouteGenie by 7:30 PM.
Submitting a schedule or communicating a trip does not count as confirmed coverage.

ACTION REQUIRED: ALL DISPATCHERS

Review these procedures and follow them from your first shift. Confirm with your lead that you have read and understood them by the end of your next scheduled shift. Management monitors compliance and reviews any failure to follow the process. The goal is to prevent missed trips, improve accountability between shifts, and keep transportation reliable across all accounts.

What Sol does and your role

Sol Transportation drives for school districts, government agencies and the medical sector, and does non-emergency medical transportation (NEMT) across San Diego County and Long Beach.

- Our adapted vans carry **wheelchair**, **ambulatory**, **gurney / stretcher**, **scooter** and **bariatric** riders (over 350 lb). We also do private trips.
- We do **not** bill health insurance (Medi-Cal or Medicare). Our programs and private riders pay us directly.

What a dispatch assistant does

- Answers incoming calls and makes outgoing calls to riders, drivers and clients.
- Enters, edits and cancels trips in RouteGenie when asked, and enters new orders.
- Reads and answers the account emails (trip updates, add-ons, cancellations).
- Helps the dispatchers and follows their instructions.
- Calls riders when the van is running late, or to tell them the driver has arrived.
- Talks to drivers on the radio when needed.

HOW WE SAY IT

A PACE rider is a **participant** (`ptt`). A VA rider is a **veteran**.

The programs we drive for, and who runs them

Every trip in RouteGenie belongs to a **payer** (the account that pays for the ride). The payer tells you which program the trip is, and the program decides the rules.

250S St. Paul's PACE — "PACE SOUTH"

- **Who runs it:** St. Paul's Senior Services, a San Diego non-profit. Its PACE program is called St. Paul's PACE.
- **What PACE is:** PACE = **Program of All-Inclusive Care for the Elderly**, a Medicare / Medi-Cal program for people 55+ who need nursing-home-level care but live at home. The PACE program covers their doctors, day center, therapy and **transportation**. We are that transportation.
- **Where participants go:** St. Paul's centers (111 Elm St, the Maple St campus, Chula Vista, El Cajon, North County, Mission Valley), outside medical appointments, dialysis, methadone clinics.
- **Who talks to us:** St. Paul's staff use the Microsoft Teams chat "Sol Dispatch Center / St Paul's Seniors". Their final trip changes come by 3:15 PM.
- **Our drivers:** St. Paul's South drivers, Paycom department 250, start from South Yard (E St).

806 FHC PACE — "FHC-WC" (Family Health Centers of San Diego)

- **Who runs it:** Family Health Centers of San Diego (FHCSD), PACE program. We call it **FHC** or **PACE Family Health**.
- **Centers:** College Grove, **3420 College Ave, San Diego 92115** ("FHC South") and **2201 Mission Ave, Suite 200, Oceanside 92058** ("FHC North"). Both open at 8:00 AM.
- **Our drivers:** FHC South drivers (Paycom 806, South Yard). FHC North trips are covered by the North drivers out of Vista together with NCTD.

0118 NCTD — North County Transit District

- **Who runs it:** North County Transit District (NCTD), the public transit agency for North San Diego County (BREEZE buses, SPRINTER, COASTER). NCTD runs **LIFT**, its ADA paratransit service (door-to-door rides for people who can't use the bus), and sends us paratransit trips.
- **Trips:** riders to day programs, work, medical. Some trips connect with **MTS Access** (the Metropolitan Transit System's paratransit in the south) at **transfer points** — those riders must never be left alone.
- **Our drivers:** North drivers, Paycom department 360, North Yard (Vista, 2525 Ramona Dr).

7114 · 7115 · 7115C SDVA — San Diego VA

- **Who runs it:** U.S. Department of Veterans Affairs, **VA San Diego Healthcare System**. Main hospital: Jennifer Moreno VA Medical Center, **3350 La Jolla Village Dr** ("La Jolla VA", "LJ").
- **7114 SDVA Gurney Veterans** = stretcher (gurney) trips, 2-person crews.
- **7115 SDVA Wheelchair Veterans** = wheelchair and ambulatory trips.
- **7115C SDVA Companion Veterans** = a veteran riding with a companion or medical attendant. Treat it like a 7115 trip that needs a seat for the companion; the driver does not stay.

- Rides are booked through the VA's travel office and **VetRide** (the VA's ride request system). "Removed from VetRide" emails mean the trip was cancelled.
- **Our drivers:** SDVA wheelchair drivers (Paycom 330), gurney crews (340), and the SDVA night crew. Mostly Spring Valley yard. No outside company covers San Diego trips, so we cover them all, far trips first.

7117 · 7118 LBVA — Long Beach VA

- **Who runs it:** Department of Veterans Affairs, **VA Long Beach Healthcare System**. Hospital: Tibor Rubin VA Medical Center, **5901 E 7th St, Long Beach**. VA dialysis is in Building 126, 9th floor.
- **7117 Long Beach Gurney Veterans** = stretcher trips. **7118 LB WC/Ambi Veterans** = wheelchair and ambulatory trips.
- Outside companies help: **MedCare** takes some gurney trips (wait-and-return and non-dialysis), **KCA Medical Transportation** takes far High Desert wheelchair trips. Our LBVA dispatcher sends them the list.
- **Our drivers:** LBVA gurney crews (Paycom 310) and wheelchair drivers in slots 1–4 (320), from Stanton Yard, the LBVA yard, or home (take-home vans).

100 Sol Transportation (our own account)

- Payer 100 is **Sol Transportation itself**. The company pays, no outside client.
- Used for **helper copies**: when a bariatric (heavy) gurney rider needs a 3rd or 4th person, we make a copy of the trip on payer 100 ("assisting with bariatric veteran") and give it to a second driver or crew. In RouteGenie: right-click the trip → **Send 2 man**.
- Also used for company legs that no client pays for, e.g. driving a crew to a hotel for an out-of-state trip ("TO ARIZONA").

Other active accounts you may see

ID	NAME IN ROUTEGENIE	WHAT IT IS
202	Torrance Unified School District	School transportation (Torrance, LA County)
305	San Dieguito Union High School District	School transportation (North San Diego County)
370	DART	Contract account
500 / 600	Private Pay / PRIVATE - DALLAS	Riders paying themselves
501 / 502	LB Veteran Private Pay WC/Ambi / Gurney	Long Beach veterans paying privately

Who runs things on our side

Sol Transportation works with One Life Transportation and FedRide (you will see @soltransportation.com, @onelifetransportation.com and @fedride.com emails). In Paycom our company shows as **MOVARA INC**.

PERSON	ROLE	WHAT THEY SEND YOU
Erick (Pedro E.) Baltadano	Dispatch Manager / operations chief. Supervises the dispatch coordinators in Paycom.	Reviews SDVA and LBVA start times, crew lists, final decisions.
Marilynn Rivera	Primary supervisor of the drivers in Paycom; VA schedules and training.	"SDVA SCHEDULE" PDF (rotational Saturday, on-call, out-of-state), "Training for new hires", "New Hire Orientation".
Bailey Valle	Program Assistant, PACE and NCTD, hiring.	"PACE & NCTD Schedule" PDF every 2 weeks, "New Hire Trainees" clearances (who drives alone, slot, FT/PT).
Brad Stone	LBVA Program Manager (Paycom: Safety & Compliance).	LBVA schedule changes.
Carlos Acosta	SDVA dispatch / coordinator.	Out-of-state trips, van swaps.
Carlos Flores	LBVA dispatch (lbva@).	MedCare and KCA lists, LBVA cancellations.
Carlos Montenegro	Accounting.	Billing and payment questions (RingCentral).
Road supervisors	Alfredo Paco (SDVA); Jorge Rivera, Andrew Sanchez, Rudy Hinojosa (LBVA).	Field help, vehicle problems.
Schedulers team	Send every driver their shift from our start-time sheets.	Call-outs, questions on the sheets.

CONFIRM WITH YOUR LEAD

Roles change. This table is from emails, schedules and Paycom as of October 2026.

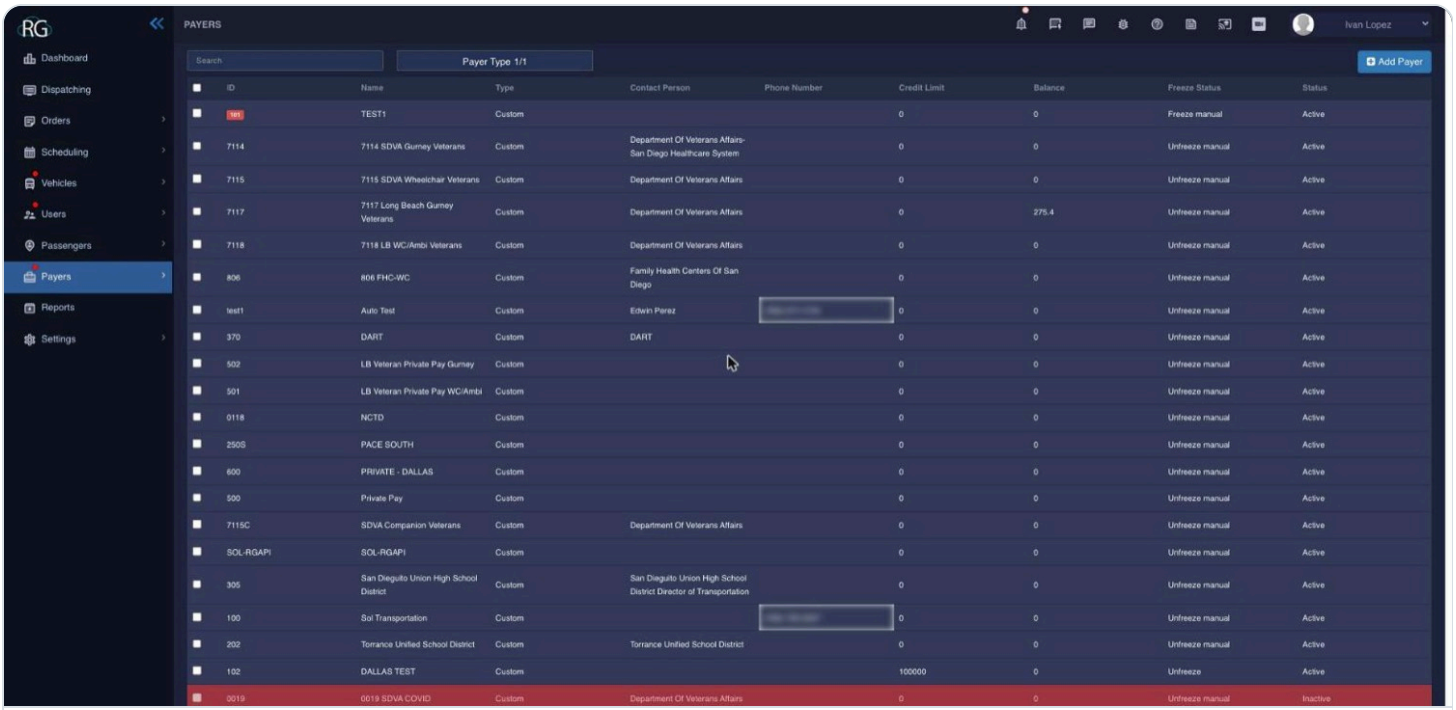

Phone numbers and addresses

The transportation desks of the programs we drive for. Use them to transfer a caller or to ask the program about a trip.

PROGRAM	PAYER	ADDRESS	PHONE
San Diego VA (La Jolla)	7114 · 7115 · 7115C	3350 La Jolla Village Dr, San Diego, CA 92161	Transportation: (858) 552-7575 → option 2

All the systems we use

RouteGenie and Paycom have their own chapters below. These are the other tools you will have open every day. Your lead gives you the logins. Never share them, and never write a password in a note or chat.

SYSTEM	ADDRESS	WHAT IT IS FOR
RouteGenie	soltransportation.routegenie.com	All trips: see, add, cancel, assign and unassign, change times, rider info, the map.
Paycom	paycomonline.net	HR and payroll: driver punches, lunches, overtime, time off, shifts.
Paylocity	access.paylocity.com	Our older payroll system. Some tutorials still show it; Paycom is replacing it.
Monthly driver	Google Sheets (new link every month, made by Ivan)	Daily list for every account: van #, driver, clock-in time and the **5th hour** (clock-in +

tracking sheet		5:00; the lunch must start before it). Filled from Paycom and RouteGenie. A lunch that starts at or after the 5th hour costs the company a penalty (CMP).
VetRide	third-party.vetride.va.gov	Where the VA sends its trips (7114, 7115, 7115C). Usually the day before; same-day add-ons are added here too.
PACE Logic	cloudwest.collabrios.com/userportal	St. Paul's PACE (250S) participant database. Sign in, pick **Pagelogic**, and the PACE portal opens in a new tab. Use it to confirm addresses, apartment numbers and phone numbers for outbound calls.
Email	Mail app	One inbox per account. Trip updates, same-day add-ons, cancellations, and some accounts send next-day trips as an Excel file.
RingCentral	App	Chat inside the company: dispatch, Schedulers, accounting and other departments.
Microsoft Teams	App	Chats with each program's transportation team and with Sol Operations.
Microsoft Excel	App	Open client files, build reports.
Employee Resources Hub	sdfleetservice.com → dispatch-resources	Report incidents, late drivers, **no call / no show**, absences, sick calls and other driver reports.
Samsara	cloud.samsara.com	Live van locations (see Vehicles and yards).

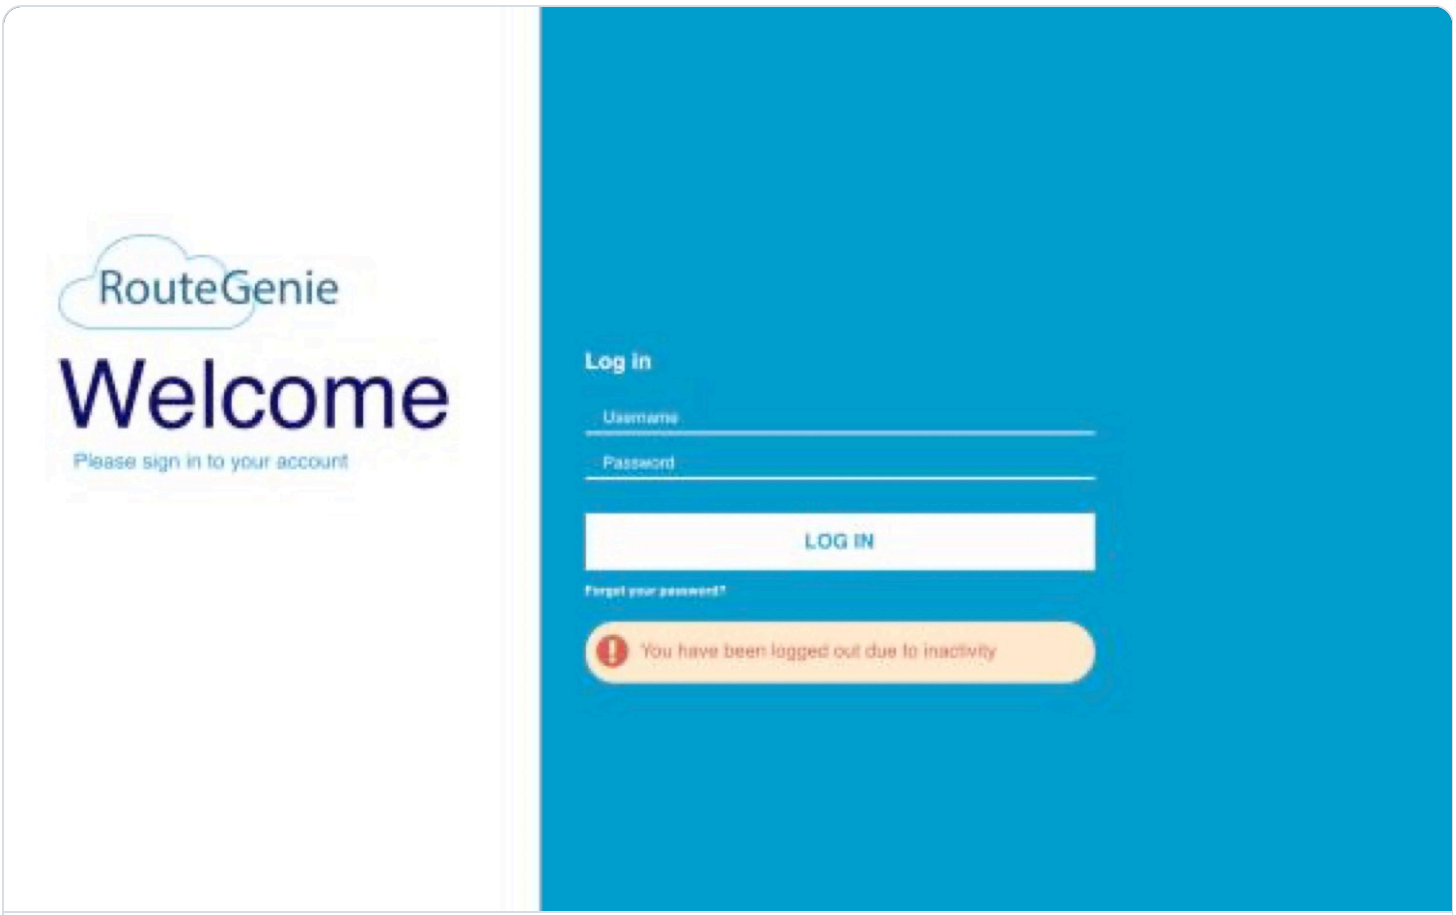

Google Drive folders

- **SOL TRANSPORTATION TUTORIALS**: video tutorials for RouteGenie, the Sol portal, Paycom and Paylocity.
- **SOL DOCS**: Sol's documents for the phone calls and procedures below.
- Dispatch Assistant training guide: English · español.

The folders open with your Sol Google account. If you can't open one, ask your lead for access.

RouteGenie: signing in and the menu

Go to **soltransportation.routegenie.com**. Sign in with your own username and password. RouteGenie signs you out after a period of inactivity.

The sign-in page. "You have been logged out due to inactivity" just means sign in again.

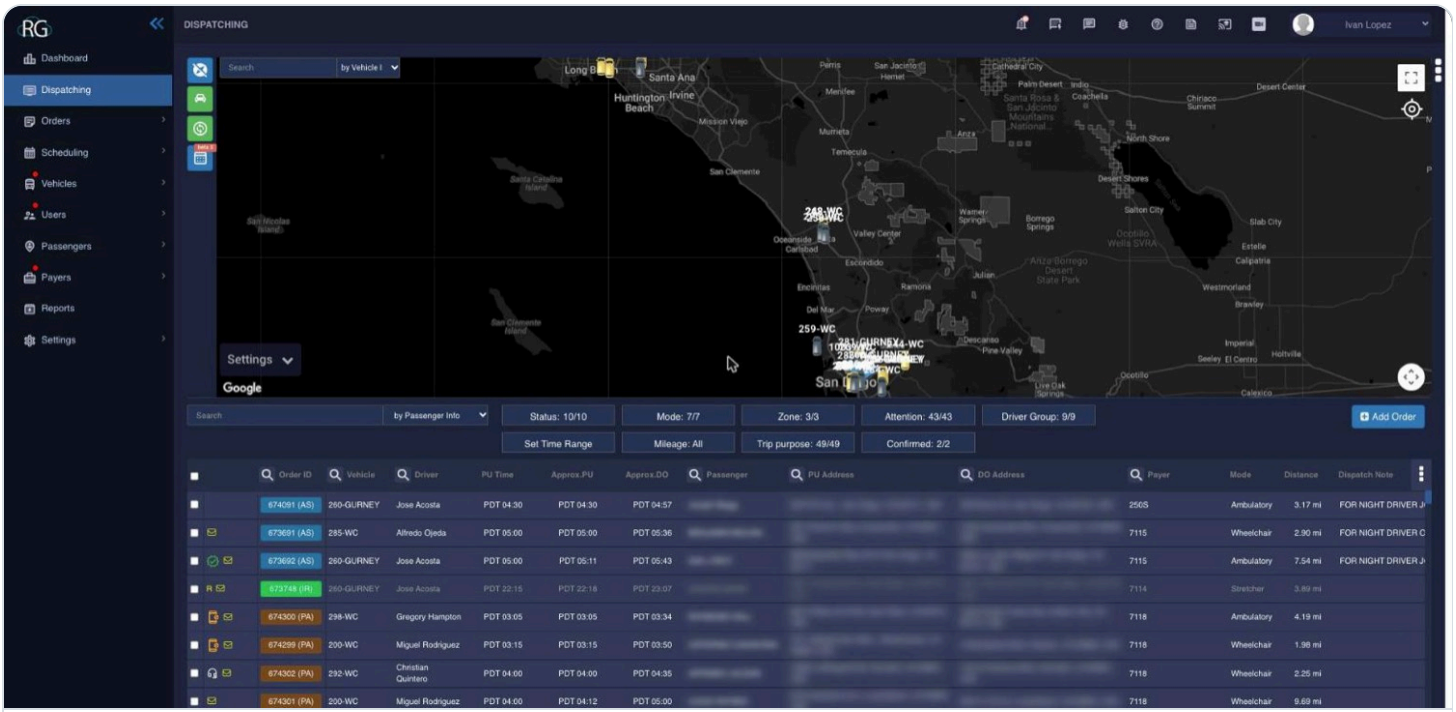

The left menu

MENU	PAGE	WHAT YOU USE IT FOR
Dispatching	—	The board for today: map, vans, all of today's trips.
Orders	Today's Orders, **Reservations**, **Trip Import**, Facilities	Search any trip on any date, activate will calls, upload trip files.
Scheduling	**Pre-Assign Modes**, Master Pre-Assign, **Driver Shifts**, Shift import, Routes	Build tomorrow's plan; see each van's shift.
Vehicles	Vehicles, Maintenance, **Base Locations**	Van status, yard (base location), capacity.

Users	Users, Driver Groups	Drivers and staff; the "Can be an assistant" switch for trainees.
Passengers	Passengers	Rider profiles.
Payers	Payers	The accounts above.
Reports	—	Build and download reports (OTP and others).

RouteGenie: the Dispatching board (today)

Menu → Dispatching. This is where today's trips are dispatched. Several dispatchers work it at the same time, so always re-check before you move a trip.

Top: the map with every van. Middle: search and filters. Bottom: today's trips, one row per trip.

Parts of the screen

- **Map search** (top left of the map, "by Vehicle ID"): type a van number to find it.
- **Left icons on the map**: the green car opens Manage Vehicles (vehicle status, send to base, check out a driver).
- **Trip search** ("by Passenger Info"): find a rider fast.
- **Filter buttons**: Status, Mode, Zone, Attention, Driver Group, Set Time Range, Mileage, Trip purpose, Confirmed. "Status: 10/10" means all 10 statuses are showing.
- **Add Order** (blue, right): create a new trip. See Creating an order.

Columns in the trip table

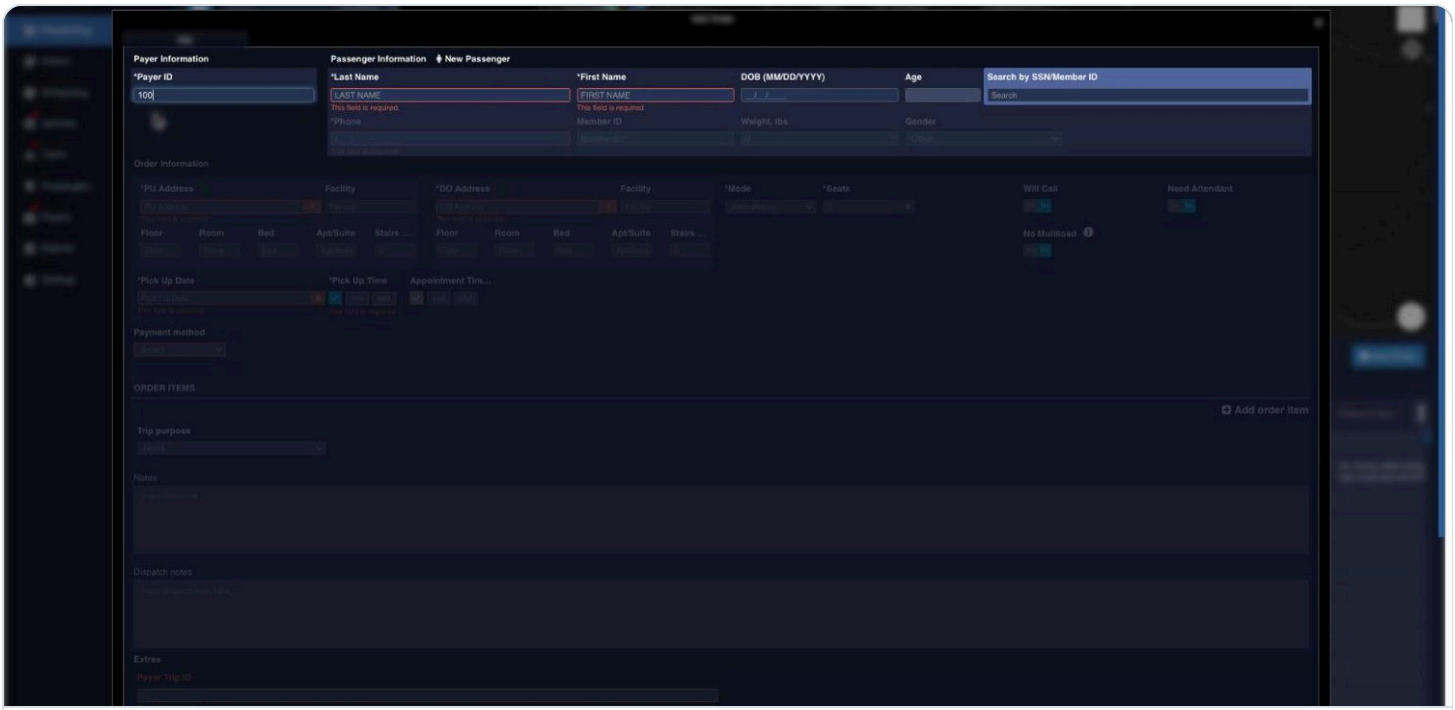

- **Order ID** with the status in brackets, e.g. `674300 (PA)`. Click it to open the trip.
- **Vehicle** and **Driver** assigned.
- **PU Time** = scheduled pick-up. **Approx.PU / Approx.DO** = RouteGenie's estimate of arrival at pick-up and drop-off.
- **Passenger, PU Address, DO Address, Payer, Mode, Distance**.
- **Dispatch Note**: notes for dispatch, e.g. `FOR NIGHT DRIVER`.
- Small icons on the left of the Order ID: see Row icons and Attention flags.

Assign a trip from the board

1. Search the passenger so the row shows.
2. In the row's **Vehicle ID** box, type the van number and pick `NNN–WC • Driver • date`.
3. The status goes to **AG** (waiting for the driver). Right-click the row → Change Status → **Assigned** so you don't have to wait.
4. New trips land at the end of the driver's route. Fix the stop order if needed (see Assigning and route order).

Creating an order (Add Order)

Dispatching board → blue **Add Order** button (right side, above the trip table). Today's Orders has the same button. Most trips come in by Trip Import or from the payer; you create one by hand when a facility or your lead calls in a new trip, an add-on or a 2-man helper trip.

The Add Order window after Payer ID 100 was picked. Red boxes are required fields that are still empty. Nothing was saved here.

Step by step

1. **Payer ID** first. Type the number (e.g. `250S`, `7118`, `100`) and click it in the list. The rest of the form unlocks only after a payer is picked.

2. **Find the passenger first**: type the Member ID in **Search by SSN/Member ID** (or the last name) and pick the rider. This fills name, phone, DOB and the saved addresses. Only use **+ New Passenger** when the rider really is new, so we don't make duplicate profiles.

3. For a new passenger fill **Last Name, First Name, Phone** (required), plus DOB, Member ID, Gender and **Weight** (always for bariatric riders).

4. **PU Address** and **DO Address**: start typing and pick the suggestion from the list so the address is placed on the map. Add Facility, Floor, Room, Bed, Apt/Suite and **Stairs Count** when you know them. The small red × clears an address.

5. **Mode** (Ambulatory, Wheelchair, Stretcher, Walker, Bariatric, Companion, Taxi) and **Seats**.

6. Switches: **Will Call** (no return time yet), **Need Attendant** (rider brings an attendant), **No Multiload** (rider must ride alone, no shared ride).

7. **Pick Up Date**, then either **Pick Up Time** (tick its box, 24-hour HH MM) or **Appointment Time (Scheduled)** if you only know the appointment.

8. **Payment method** (Voucher, Credit card, Cash, Check, TBD, Pass) is for private pay. Leave it empty for program trips.

9. **Trip purpose**: pick from the list (Clinic, Dialysis, Outside Appointment, Day Center, Hospital

Discharge, SNF Discharge, PACE Psychiatry, Dental...).

10. **Notes** = order notes; they show behind the envelope icon on the board. **Dispatch notes** = internal notes for dispatch (they show in the Dispatch Note column).

11. **Extras → Payer Trip ID**: the payer's own trip number. Some payers (e.g. 100) require it.

12. **Round Trip** adds the return leg (give it a time, or turn on Will Call). **Add Extra Leg** adds another stop.

13. Save with one of the buttons at the bottom (they appear when the required fields are filled).

BUTTON	WHAT IT DOES	USE IT?
Save	Creates the order (UA, unassigned).	Normal choice
SAVE & HOLD	Creates it on hold, so it is not dispatched yet.	When the trip still needs confirming
Create Standing Orders	Makes a repeating order (e.g. dialysis every Mon/Wed/Fri).	Only when your lead says it is a standing trip
Create and complete	Creates the order already completed.	Only for a trip already driven that was never entered, with your lead's OK
Save and Pay	Creates it and takes payment.	Private pay only

CHANGED YOUR MIND?

Close the window with the × at the top right. Nothing is created until you press a save button.

AFTER SAVING

Search the passenger on the board to find the new trip, check the pick-up time and addresses, then assign it (see Assign a trip from the board). Add a Dispatching Note saying who asked for the trip.

Trip statuses

The two letters next to every Order ID. Meanings from RouteGenie's help center.

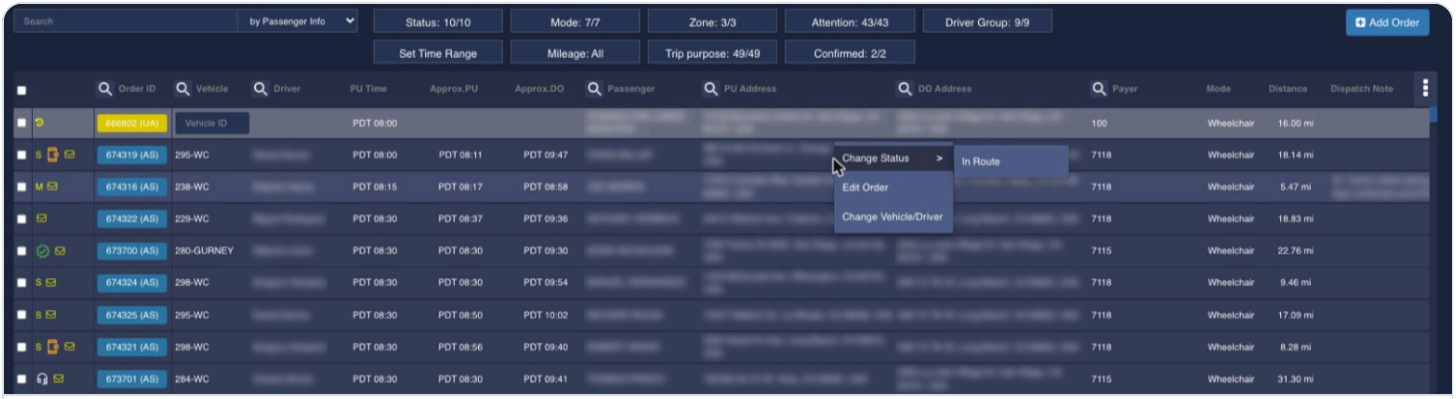

CODE	STATUS	MEANING
UA	Unassigned	In the system, no driver yet.
PA	Pre-Assigned	Placed on a van in a pre-assign (tomorrow's plan).

AG	Assigning	Sent to a driver, waiting for them to accept.
—	Offered	Listed in the board's Status filter (not in the help center). We rarely see it on our programs; ask your lead if a trip shows it.
AS	Assigned	Driver has it.
IR	In Route	Driver heading to the pick-up, or carrying the rider.
LO	Loaded	Rider is in the van.
WC	Will Call	Waiting for the rider to call for a return time.
CO	Completed	Done.
CA	Canceled	Cancelled. The name under the order shows who cancelled (e.g. RG, MedCare).
NS	No Show	Rider didn't show.

Driver app order of buttons: **Start Now** → **Call Out** (texts the rider "I'm here") → **Load** → **Complete**, or **No show**.

Changing a trip's status

Drivers move trips forward in the app (In Route, Loaded, Completed, No Show). Dispatch changes a status by hand only to fix something or when your lead asks.

Right-click a trip on the Dispatching board → Change Status. The list only offers the statuses that can come next: this Assigned (AS) trip can only go to In Route. Passenger, driver and address columns are blurred.

1. On the Dispatching board, find the trip (search the passenger or the Order ID).
2. **Right-click** the row. The menu has **Change Status**, **Edit Order** and **Change Vehicle/Driver**.

3. Point at **Change Status >** and click the new status.
4. Check the letters next to the Order ID changed, and add a Dispatching Note saying why.

SITUATION	WHAT TO DO
Trip stuck on **AG** (Assigning) because the driver hasn't accepted	Change Status → **Assigned**. This is the change dispatch makes most often.
Driver forgot to press Start / Load	Call the driver first. Change it yourself only if they can't (e.g. the app froze).
Driver says the rider wasn't there	The driver marks **No Show** in the app after waiting. Don't do it from the board unless your lead tells you.
Trip done but not marked completed	Ask the driver to complete it in the app; your lead decides if it is completed by hand.
Wrong van / driver	Right-click → **Change Vehicle/Driver**, or type the van in the row's Vehicle ID box.
Take a trip off a van	Use the row's **unassign** button (it goes back to UA).
Rider or facility cancels	Tell your lead. Only the lead cancels (the row's × button or CANCEL in the order window).
Will call is ready	Give the return a time in Reservations (see Activate a will call).

Every status change is saved in the order's **History** tab with your name and the time.

Row icons and Attention flags

The little icons left of the Order ID tell you something about the trip. Hover over an icon to see what it means.

ICON	MEANING
Red clock	Late dispatch: the trip should already be moving. Look at it now.
Yellow **R**	Return order (the ride home).
Yellow **S**	Suggested shared ride (multiload) #number: RouteGenie thinks it can ride with another trip.
Yellow **M**	Multiload #number: it is a shared ride with another trip.

Envelope	The order has notes. Hover to read them (pick-up details, gate codes, the VA's comments).
Headset / phone icons	Results of RouteGenie's automatic calls to the rider: ETAs given, Approved, No answer, and so on.

The Attention filter

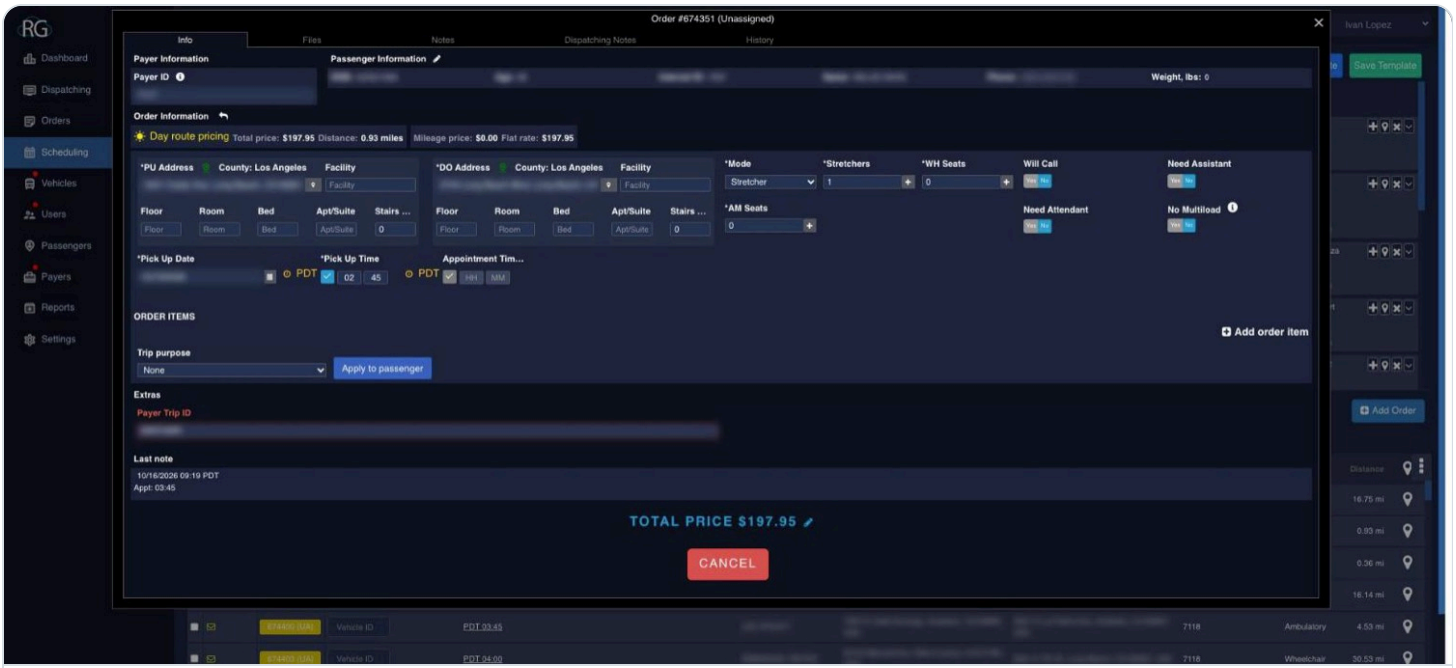

The **Attention** button above the trip table lists 43 flags. Untick everything and tick one flag to see only those trips. The useful ones:

- **Late violation**, **Late dispatch**, **Need dispatch**, **Auto dispatch failed**: trips that need a dispatcher now.
- **Bad address**, **Wrong address**, **Outside radius**, **No PU Zone / No DO Zone**: fix the address before the driver goes.
- **Need assistant**, **Need attendant**, **Not enough provided wheelchairs onboard vehicle**: check the van and crew.
- **Duplicate**, **Update order**, **Client was canceled today order**: check with your lead before anyone drives.
- Call-system flags (**Approved / Cancelled / No answer / Hang up / Wrong number by call system**, **ETAs given by call system**): what the rider did on the automated call.
- **No Show Review**, **Scheduled / Assigned Outside Facility Hours**, **Auto Unassign Due Inactivity Alert**.

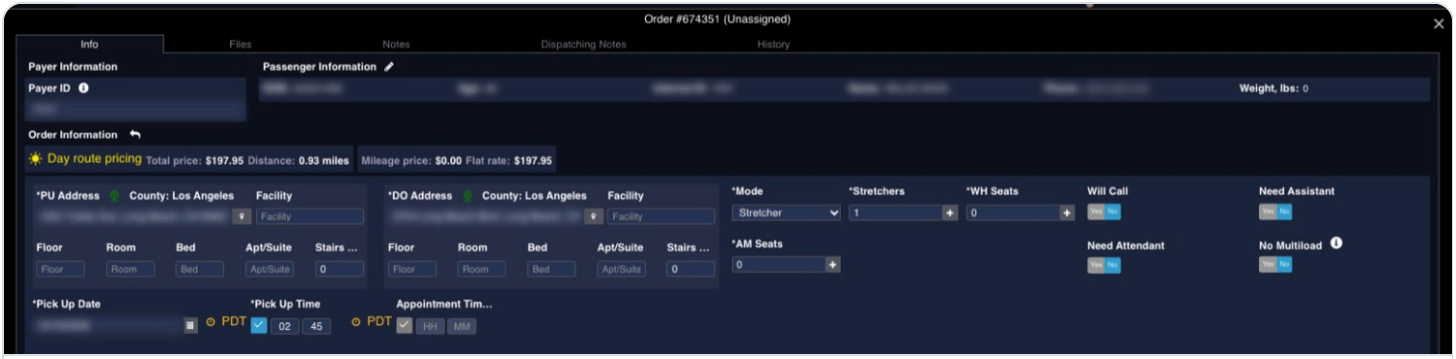

The **Status** filter works the same way: Unassigned, Assigning, Offered, Assigned, Pre-Assigned, In route, Loaded, Will call, No show, Completed.

The order window

Open a trip by clicking its Order ID, or right-click → Edit Order. Tabs across the top: Info, Files, Notes, Dispatching Notes, History.

The Info tab. Note the big red CANCEL button at the bottom: it cancels the trip.

Close-up: payer, passenger (blurred), addresses, mode, seats, Will Call, Need Assistant / Attendant, No Multiload, and the Pick Up / Appointment time boxes.

Change a pick-up time

1. Right-click the trip → **Edit Order**.
2. Tick the checkbox next to **Pick Up Time** (the appointment boxes grey out).
3. Type HH and MM in 24-hour time (e.g. `07` `45`).
4. Click **SAVE** (it only appears after you change something).
5. Close the window with the **× in the top-right corner**, never with CANCEL.

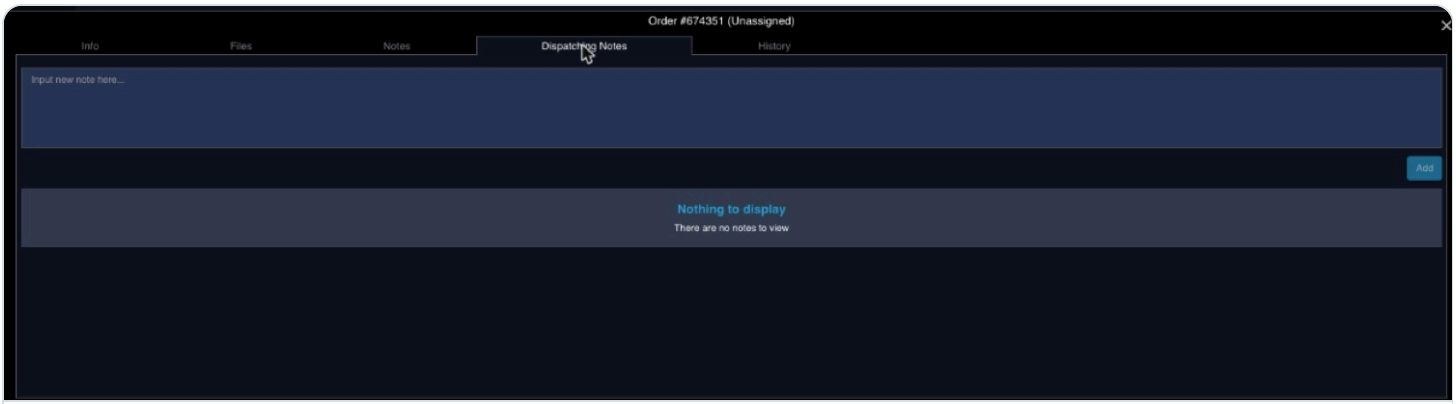

NEVER CLICK THE RED CANCEL

CANCEL cancels the trip for the rider. Only your lead decides cancellations. To close the window, use the × at the top right.

BLUE DOT AND "APPT:"

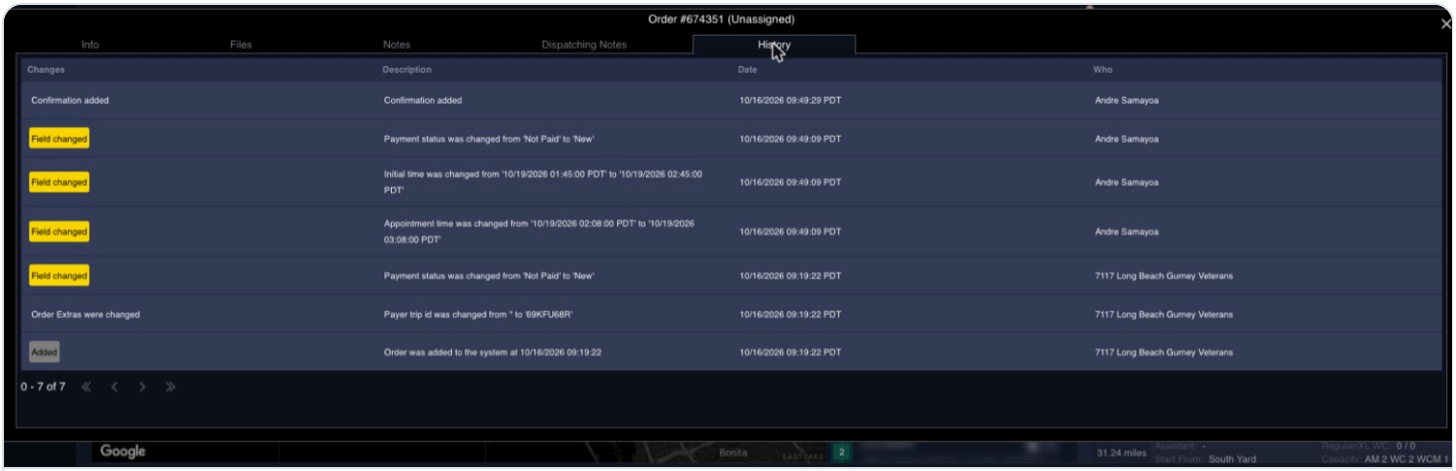

When the appointment box is ticked (blue dot on the row), RouteGenie works out its own pick-up from the appointment. Ticking Pick Up Time takes the blue dot off. VA trips carry the original appointment in the notes as `Appt: HH:MM`.

Dispatching Notes tab

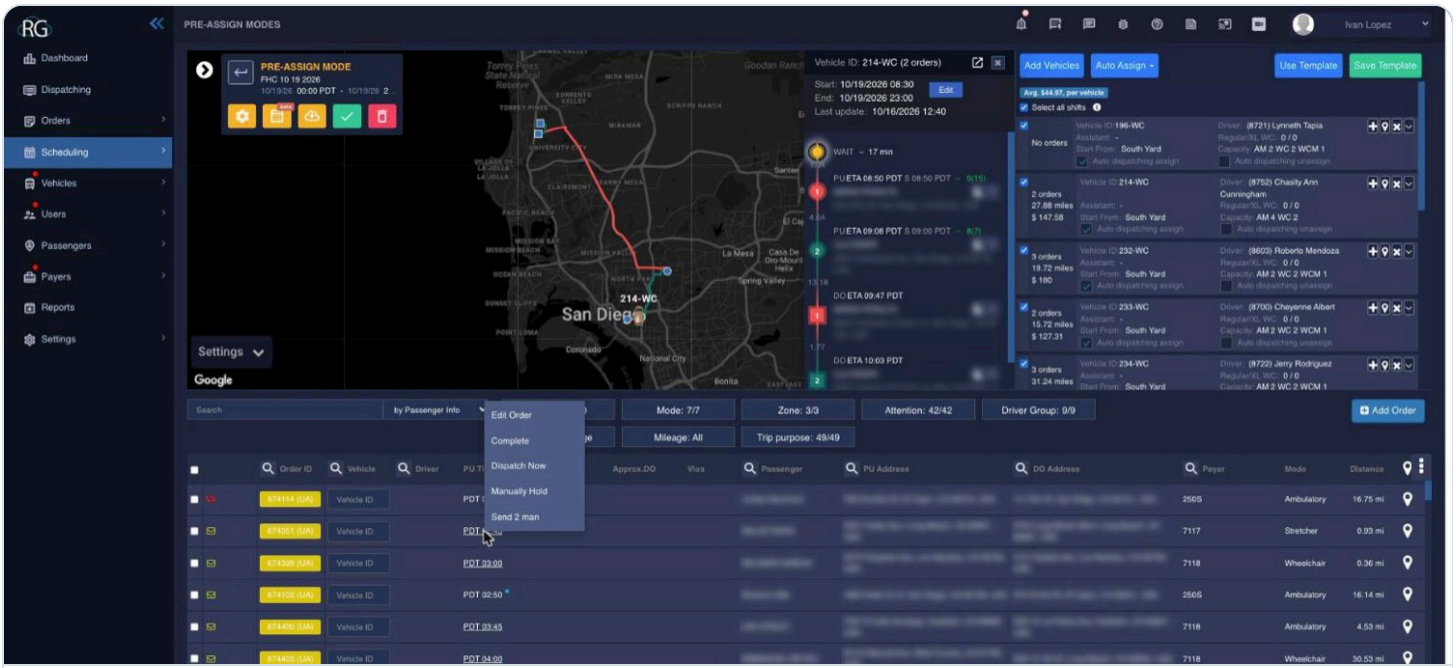

Type a note and click Add. Used for "FOR NIGHT DRIVER ...", "MEDCARE", ETA calls.

History tab: who changed what

Every change with the time and the user. Use it when a trip moved or got unassigned and nobody knows why.

The right-click menu on a trip

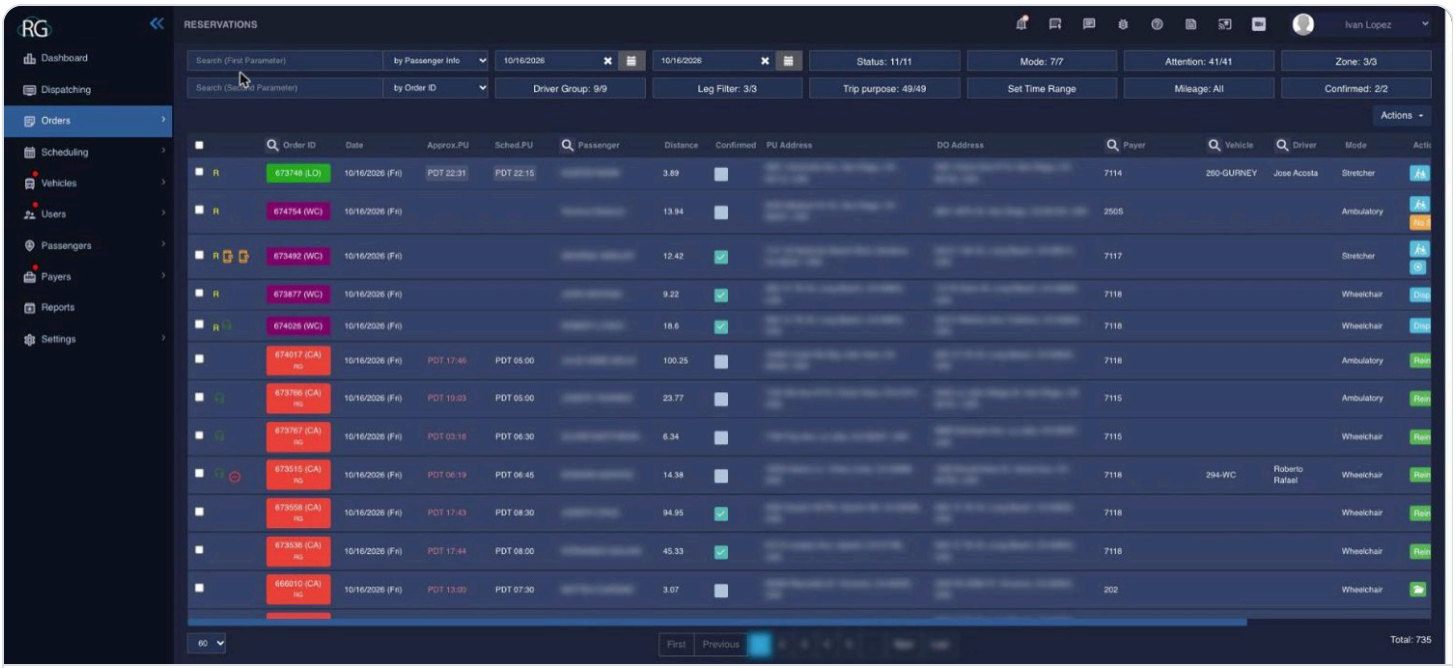

Right-click on a trip row in a pre-assign.

OPTION	WHAT IT DOES	USE IT?
Edit Order	Opens the order window.	Yes
Complete	Marks the trip completed.	**No** — drivers complete trips in the app
Dispatch Now	Activates / sends the trip right now.	Only when told. For will calls set a time instead.
Manually Hold	Puts the trip on hold.	Only when told
Send 2 man	Makes a helper copy for a 2-person (bariatric) trip.	When a bariatric rider needs a helper; the copy goes on payer 100

On the Dispatching board the right-click menu is shorter: **Change Status**, **Edit Order** and **Change Vehicle/Driver**. See Changing a status.

Reservations: find any trip, any day

Menu → Orders → Reservations. Works for past and future days, unlike the Dispatching board.

Two search boxes (first: by Passenger Info, second: by Order ID), From / To dates, and filters. Status colours: green LO, purple WC (will call), red CA (cancelled).

1. Set the **From** and **To** dates to the day you need.
2. Type the rider's name in the first box, or the order number in the second box (set to "by Order ID"), and press Enter.
3. Click the Order ID to open the trip. History and Dispatching Notes are there too.

Activate a will call (give the return a time)

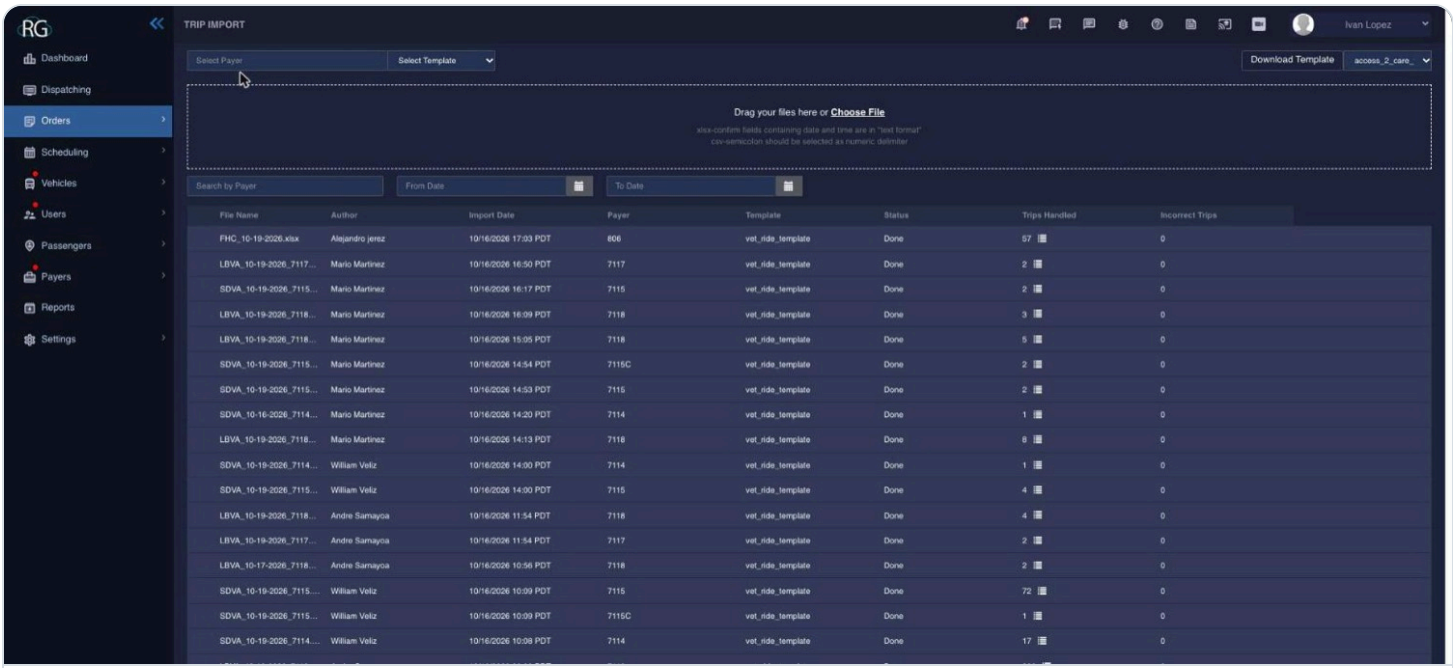

1. Find the return trip (purple **WC**) and open it.
2. Set **Will Call** to **No**, type the pick-up HH and MM, click **SAVE**. Payer 100 trips ask "Confirm Price $0" → Yes.
3. The trip becomes **UA** at that time and can be assigned.

NOT "DISPATCH NOW" / "READY NOW"

Those buttons activate the trip right this minute. On Saturdays we activate will calls at the times they were ready last Saturday.

Trip Import: uploading trip files

Menu → Orders → Trip Import. This is how NCTD, FHC and VA trip lists get into RouteGenie.

Select Payer, Select Template, then drag the file in. The list shows every upload: who, when, payer, how many trips and how many failed.

1. Get the file from the email (e.g. NCTD "SOL Trips MM.DD.YY.xlsx", FHC North "North county transportation request"). Run it through our processor page for that program (it sets the pick-up times).
2. Compare with what is already in RouteGenie: a rider already imported can come back with a new time. Don't upload duplicates.
3. Type the payer in **Select Payer** (0118, 806, 7115...) and click the suggestion.
4. Choose template `vet_ride_template`.
5. Drag the file in or click **Choose File**. Status goes "In progress" → "Done". Check **Trips Handled** and **Incorrect Trips** (should be 0).
6. Check the new trips in Reservations.

VA pick-up times: how they are set

For **SDVA** and **LBVA** trips, the pick-up time comes from our processor pages when the VetRide manifest is uploaded. **The processors do the math.** This table is here so you can check a pick-up time when it looks wrong.

Trips going to an appointment

Pick-up = appointment time minus the lead time below. The distance is the manifest's **Estimated Distance (miles)** column (VetRide's number). The original appointment is kept in the trip notes as `Appt: HH:MM`.

DISTANCE (MILES)	SDVA 7114 / 7115 / 7115C	LBVA 7117 / 7118
25 or less	2 h to the La Jolla VA (3350 La Jolla Village Dr); 1 h to anywhere else	2 h (1 h for dialysis that is not at the VA)
Over 25, under 70	2 h	2 h
70 to 80	2 h	2.5 h
Over 80, under 100	3 h	2.5 h
100 to under 140	3 h	3 h
140 to 200	3 h	3.5 h
Over 200	3 h	4 h
No distance in the file	2 h	2 h

- **A requested time always wins.** If the notes say "preferred / specific / requested pick up" with a time, that time is the pick-up (both VAs).
- **LBVA standing dialysis times:** some regular dialysis veterans have a fixed pick-up (and sometimes a fixed return) on their dialysis days (Mon/Wed/Fri or Tue/Thu/Sat). The LBVA processor sets those times by name, ahead of the table. Your lead has the current list.

Return trips

Checked in this order. The first one that fits sets the pick-up:

1. The manifest's pick-up is the **day after** the appointment: keep it.
2. **SDVA only:** the return becomes a **will call** when the pick-up is at the La Jolla VA, or when the manifest time is 23:59 or 23:00. Discharges and airport trips are **never** will calls.
3. **LBVA only:** a standing dialysis return time, if the veteran has one.
4. The drop-off is **the VA itself** (La Jolla or 5901 E 7th St, Long Beach), and it isn't a discharge or airport trip: pick-up = the appointment time.
5. The notes give a time ("return at", "done at", "pick up at", or the end of a time range): pick-up = that time. SDVA ignores a note time that is earlier than the appointment.
6. Otherwise: pick-up = the appointment time.

THE PROCESSOR FLAGS THESE FOR A PERSON TO CHECK

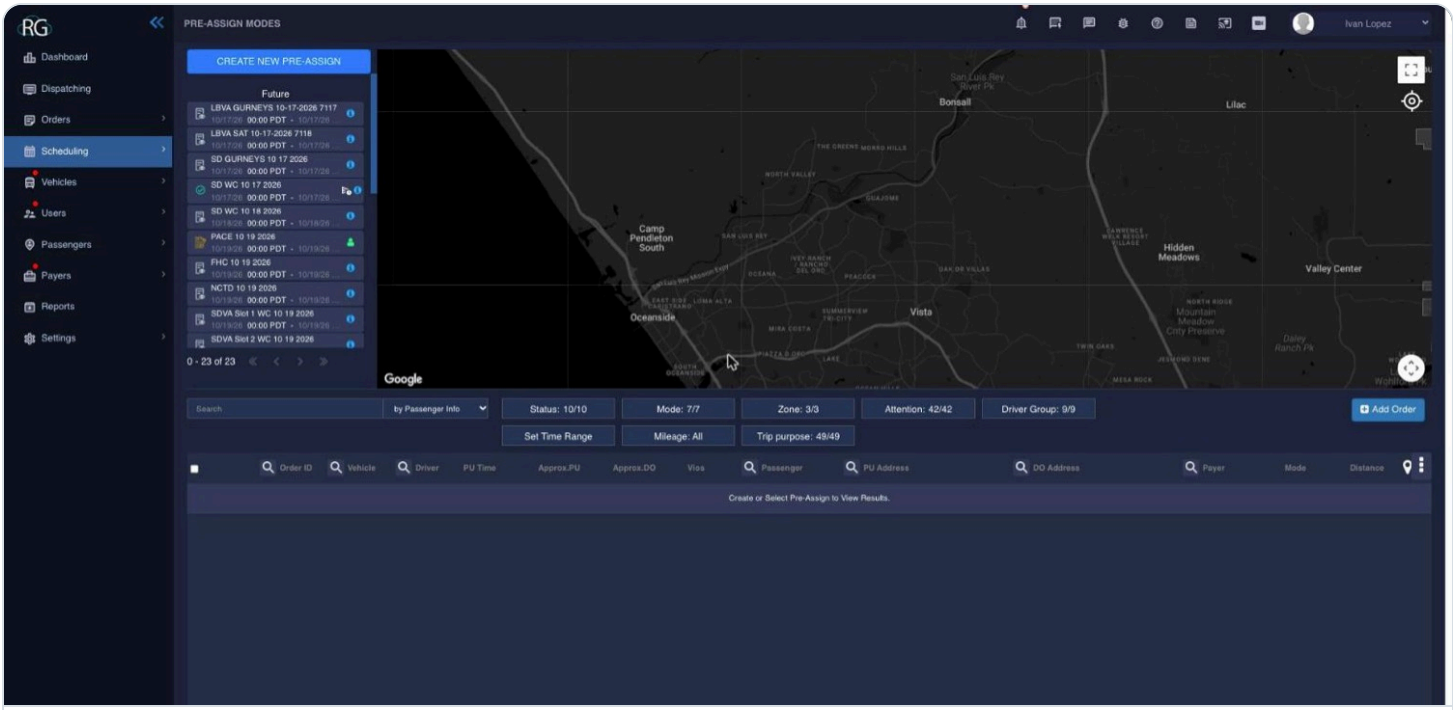

Trips over 100 miles, bariatric (300+ lb or "3-4 man"), wait-and-return, and out of state.

EXAMPLE (MADE UP)

SDVA veteran, appointment 9:30 at the La Jolla VA, 18 miles: 25 or less and going to La Jolla → 2 h → pick-up **7:30**. The same trip to a clinic in Chula Vista → 1 h → **8:30**.

Pre-Assign Modes: building tomorrow

Menu → Scheduling → Pre-Assign Modes. A pre-assign is the plan for one program (or slot) for one day: which vans run, who drives, who rides along, and which trips each van takes.

The list of future pre-assigns on the left. CREATE NEW PRE-ASSIGN at the top.

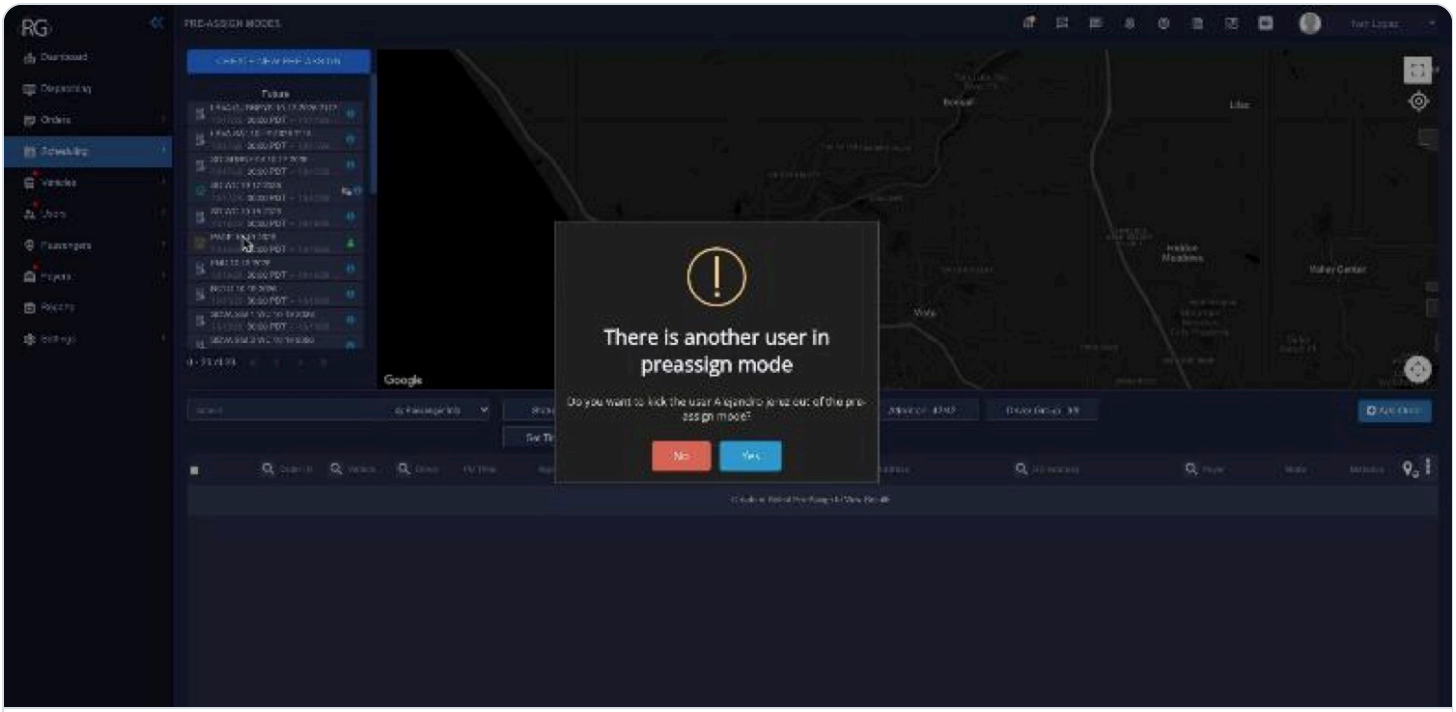

Our pre-assign names

PROGRAM	NAME
250S	`PACE MM DD YYYY`
806	`FHC MM DD YYYY`
0118 + FHC North	`NCTD MM DD YYYY`
SDVA	`SDVA Slot 1 WC`, `Slot 2 WC`, `Slot 3 WC`, `SDVA GURNEYS`
LBVA	`LBVA SLOT1 ... SLOT4 MM-DD-YYYY 7118`, `LBVA GURNEYS MM-DD-YYYY 7117`

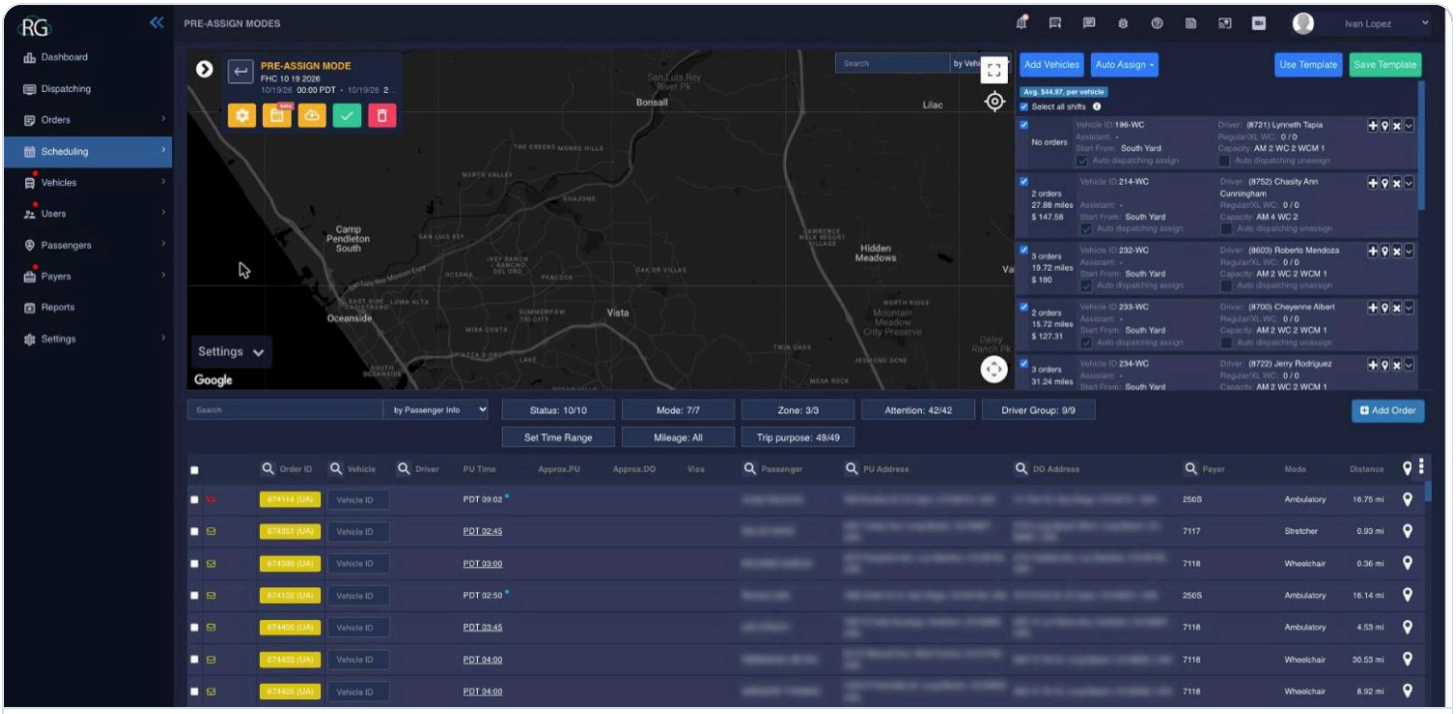

Saturday San Diego	`SD WC MM DD YYYY`, `SD GURNEYS MM DD YYYY`

Opening one

Click the name in the list. If someone else is inside, you get this warning:

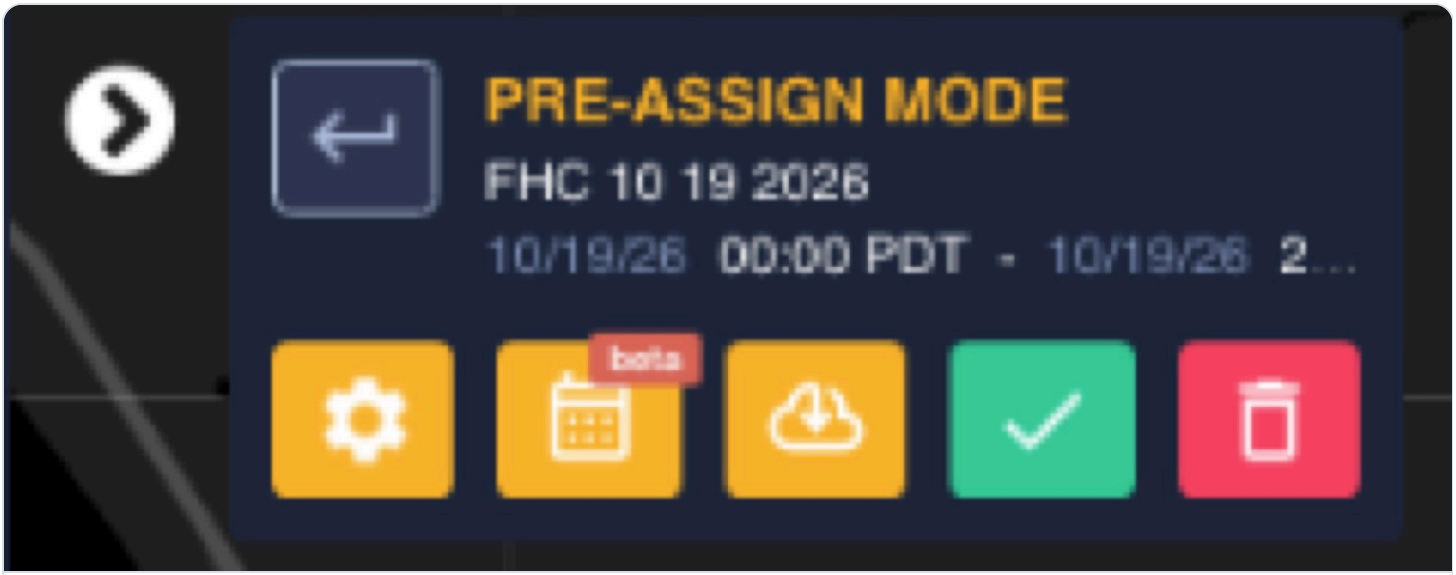

"There is another user in preassign mode". Yes kicks them out. Click No unless your lead says the work is yours, and tell them.

Inside a pre-assign: map (left), vans and drivers (right), trips (bottom).

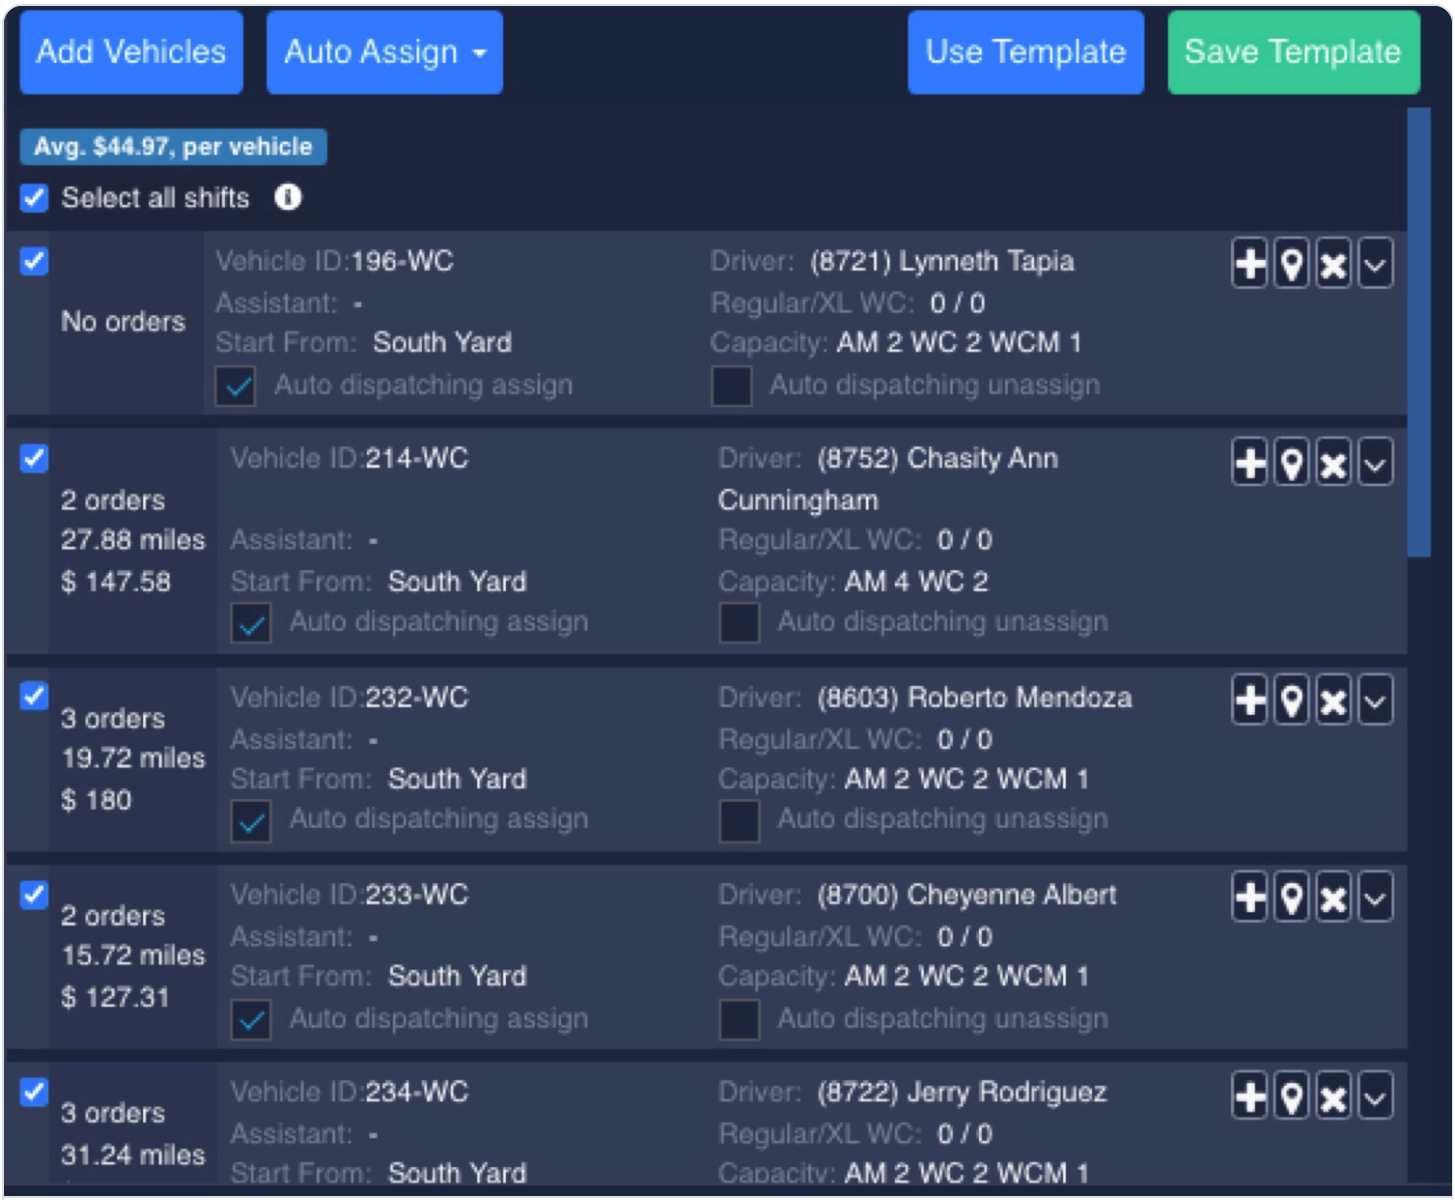

The pre-assign toolbar

From left: back arrow (leave), gear (settings), calendar, cloud, green check (Optimize and Close), red trash (delete the pre-assign).

BUTTON	WHAT IT DOES
Back arrow	**Leaves and keeps everything** (trips, start times, drivers without trips). Use this while work is still pending.
Green check	**Optimize and Close.** Finalizes the day and creates the drivers' shifts. Drivers with no trips are **removed**. On an empty pre-assign it **deletes the pre-assign**. Only when everything is done and your lead says so. After it, a "Send Pre Assign Notification" window appears: click **SKIP**.
Red trash	Deletes the pre-assign. Never.

The van cards (right side)

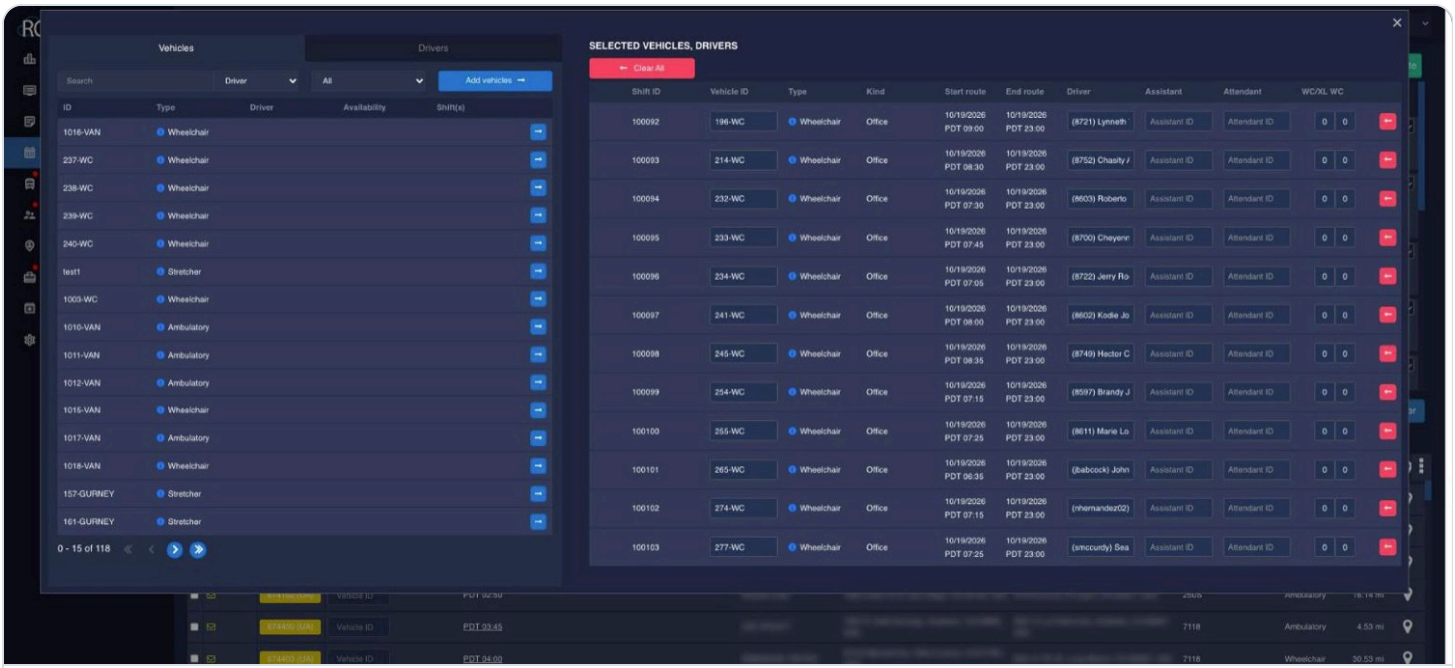

Each card: number of orders, miles, Vehicle ID, Driver, Assistant, Start From (yard), capacity. Icons: + (add), pin (show on map), x (REMOVE the van), arrow (open settings such as Start From).

THE X ON A CARD REMOVES THE VAN

It is not a "close" button.

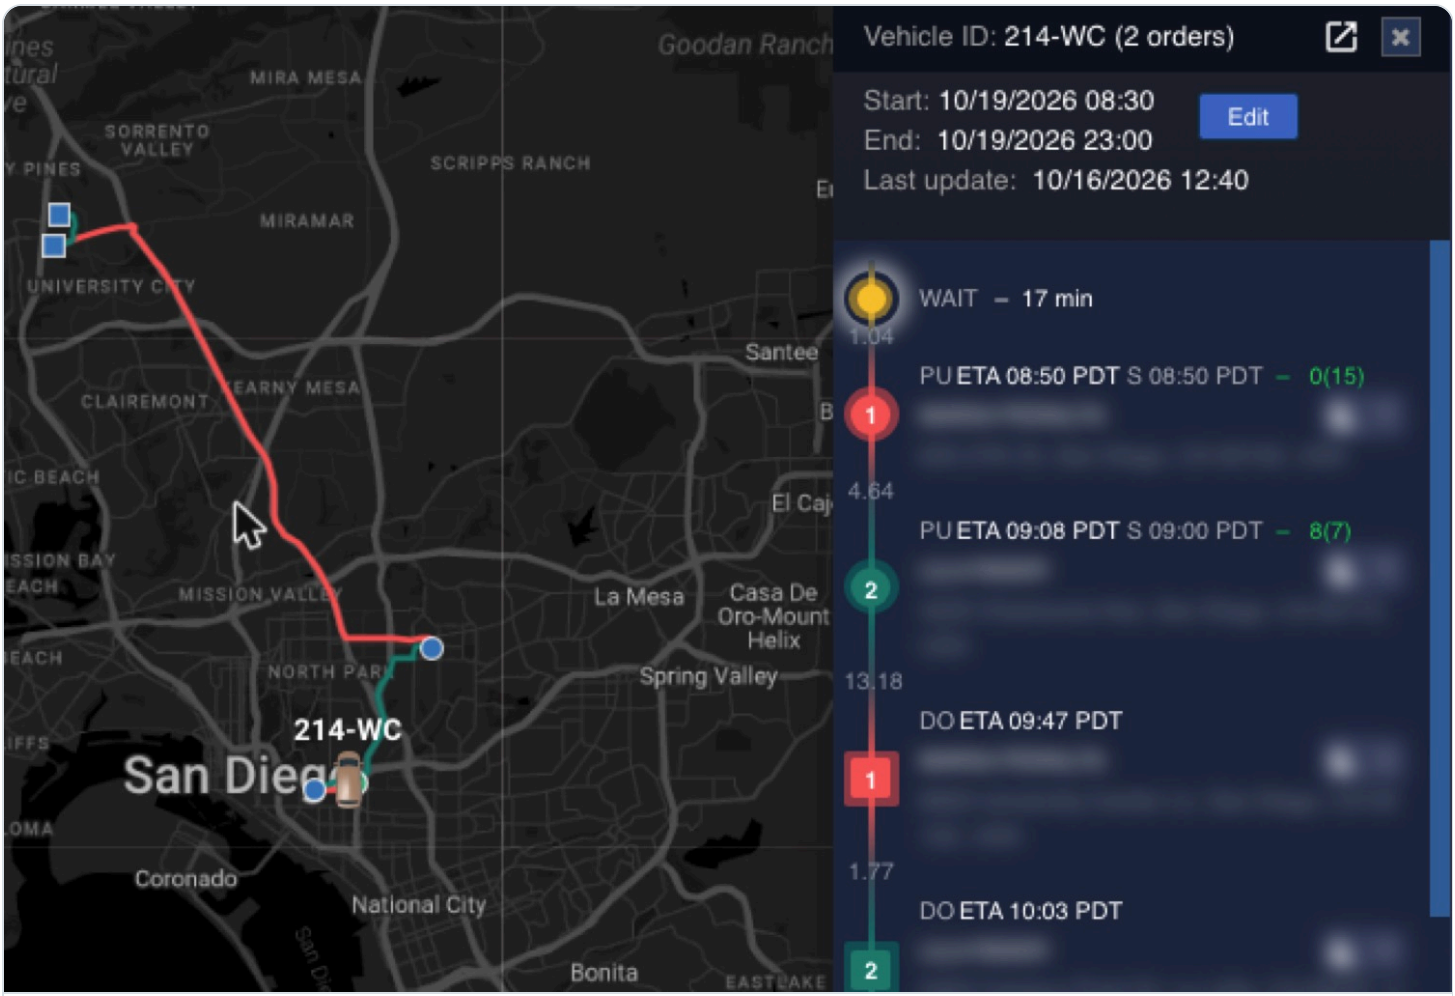

Add Vehicles: put vans, drivers and helpers in

Left: all vehicles (blue arrow adds one). Right: vans in this pre-assign with Driver, Assistant and Attendant boxes. Red arrow removes a van.

1. Click **Add Vehicles**. Search the van number on the left and click its **blue arrow**.
2. On the right, type the driver's name in the **Driver** box and pick them from the list.
3. Gurney partner or trainee → **Assistant** box. A third person (trainee/helper on a gurney crew) → **Attendant** box. If a trainee doesn't come up: Users → open them → turn on **Can be an assistant** → Save.
4. To take out a driver who called out: move their trips off first, then click the **red arrow** on their row → Yes.
5. Close with the × at the top right of the window.

The route panel

Search the van on the map, click its marker. The panel shows the route Start / End, Edit, and every stop in order with ETAs. Numbers in green are minutes early/late.

- **Edit** sets the route's Start and End. Before assigning: Start 01:00, End 23:00 the same day. After routing: Start = the driver's start time from our sheet.
- Drag stops to change the order, read the new ETAs, then click the green **Apply** (or red **Discard**).

Assigning trips and fixing the route order

1. **Read first:** schedule PDFs (Bailey's PACE & NCTD, Marilynn's SDVA, the LBVA schedule), new-hire emails, Paycom time off, and every chat since last night.
2. **Check the roster** in the pre-assign: add missing drivers, remove drivers who are off, set partners and trainees, check Start From = the driver's yard.
3. **Open every route** (route panel → Edit) and set Start 01:00, End 23:00 the same day.
4. **Apply the program's pick-up rules** (St. Paul's blue dots, standing times).

5. **Assign**: in the trip row's **Vehicle ID** box type the van and pick it from the list. The row turns **PA**.
6. **Fix the order** in the route panel so shared rides are real (pick up A, pick up B, drop A, drop B). Read the ETAs before Apply.
7. **Set each route's Start** to the start time on our sheet, End 23:00.
8. **Re-check** for new trips, cancellations and changes before the sheet goes out. Leave with the back arrow.
9. **Green check + SKIP** only when your lead says the day is done.

DEADLINE

Every trip with a pick-up at or before 8:00 AM must be pre-assigned with confirmed coverage by **7:30 PM** the night before. If you can't cover one, notify management immediately. See Coverage procedures.

Program rules in one table

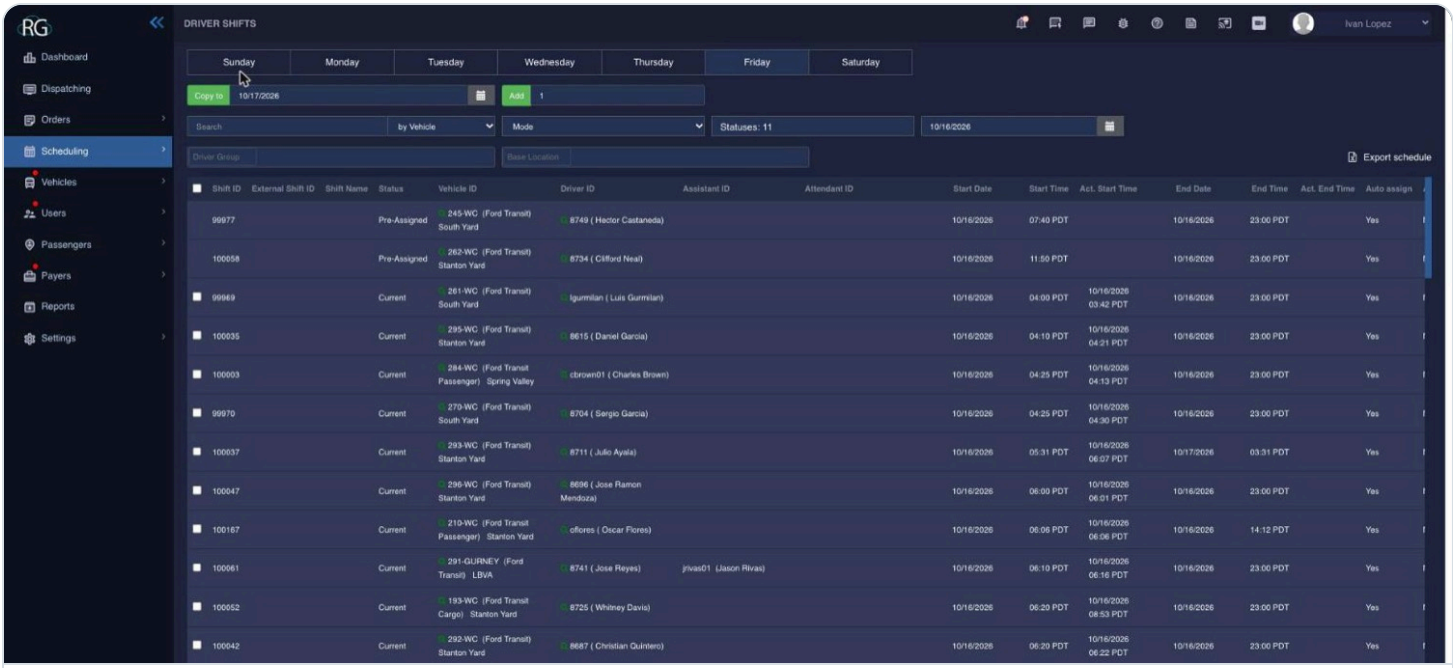

PROGRAM	PICK-UP TIMES	LATE OK	RIDE TIME	SHARING
250S	Blue-dot A legs: appt at or before 6:30 → minus 30 min; after 6:30 → minus 60 min. Returns never change.	PU up to 15 min; arrive before appt	60 min, max 70	Yes, about 3 on board; no BB/ISO, no companions
806	Outside appt: 1 h before. Center opens 8:00; DC 8-9. Move only if needed, tell lead over 75 min	15 min on fixed times	60, max 70	Max 3 on board
0118	**Never changed**	30 min	No limit	Full capacity to the same place
7114/7115/7115C	Set by our processor from the distance (see VA pick-up times)	Appointments on time	Longer OK	WC yes; gurneys never with WC on board
7117/7118	**Not changed** (except standing dialysis times). Set by our processor from the distance (see VA pick-up times)	PU can run late, appt must be on time	No limit	WC yes; gurneys never

NEVER MIX PROGRAMS ON BOARD

St. Paul's with FHC, or NCTD with FHC: back-to-back is fine, never in the van at the same time.

Driver Shifts

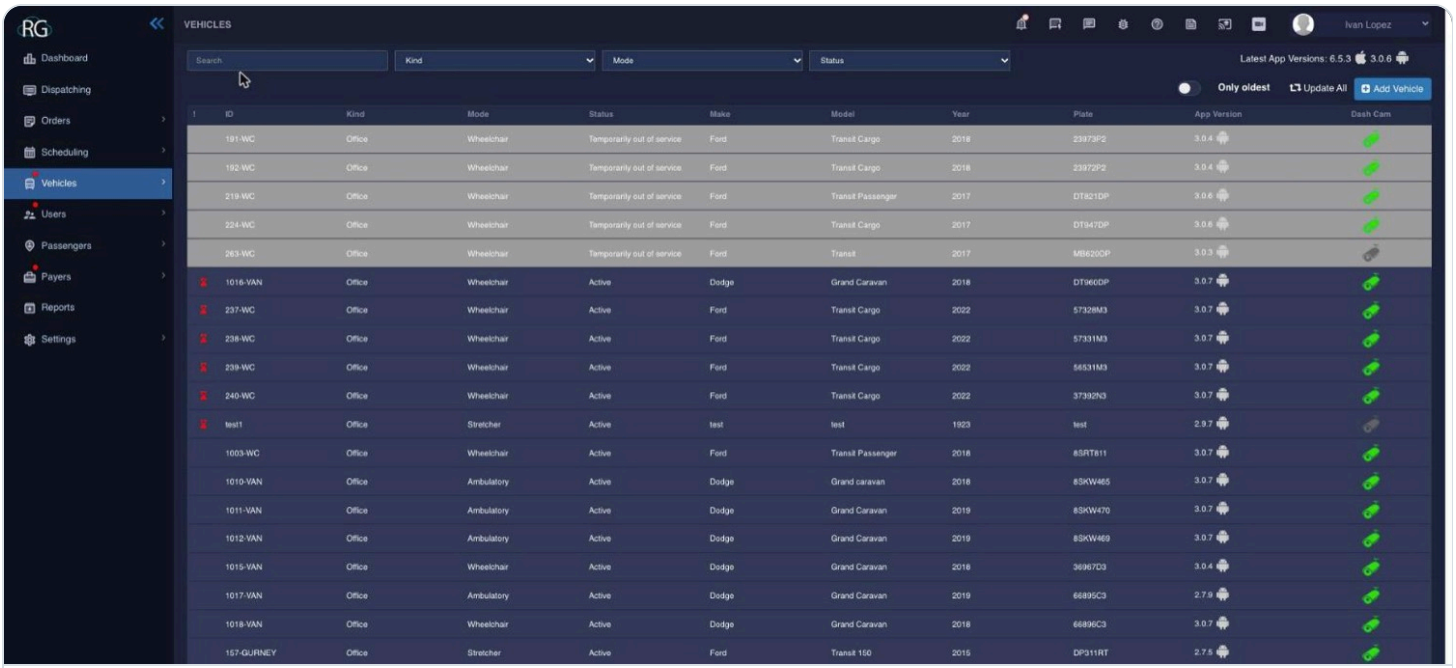

Menu → Scheduling → Driver Shifts. One tab per weekday. Shows every van's shift: driver, assistant, start and end, actual start, status (Pre-Assigned, Current...).

Pick the weekday tab, then search by vehicle. Act. Start Time = when the driver really started in the app.

You need this page for the **"Route time must keep a 1 min gap"** error: today's shift on that van runs past midnight. Open today's weekday tab, find the van, Edit, pull the End Time back (e.g. 00:58), Save, then try again in the pre-assign. If that shift is still being driven tonight, start tomorrow's route after it ends instead.

Vehicles and yards

Menu → Vehicles. Grey rows = Temporarily out of service. Mode (Wheelchair, Ambulatory, Stretcher), make, model, year, plate.

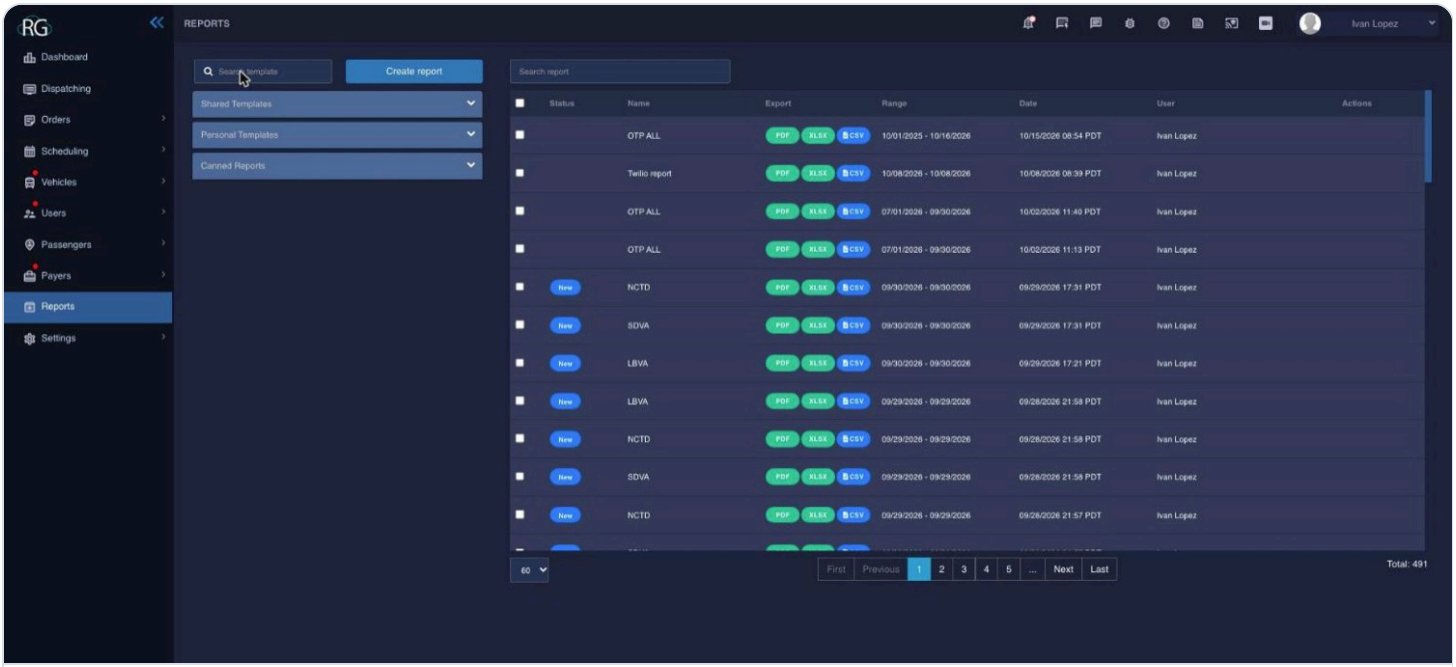

Click a van to open its details. Base Location = the yard it starts from. Model Type: rear load or side load.

- **Base Location** options: South Yard, North Yard, Spring Valley, Stanton Yard, LBVA. When a van moves yards, the base and the route's Start From must change too.
- **Samsara** (cloud.samsara.com) shows where each van really is. Trust Samsara when they disagree.

- Drivers start from their own yard. South Yard and Spring Valley drivers never start at Vista.

Reports

Menu → Reports. Create report, or use Shared / Personal templates and Canned Reports. Each generated report downloads as PDF, XLSX or CSV.

The **OTP ALL** report is the trip export we use for on-time performance and start-time checks.

Common RouteGenie errors and what to do

YOU SEE	WHY	FIX
Order pick up time is earlier than shift start time.	The route starts after the trip.	Route panel → Edit → Start 01:00 → Save.
Route time must keep a 1 min gap to route #...	Today's shift on that van runs into tomorrow.	Driver Shifts → today → Edit → End 00:58 → Save. Or start tomorrow after it ends.
Assign is creating overlapping route.	Van already busy at that time, or in two pre-assigns.	Clear the other trips first or keep the driver in one pre-assign.
Unable to assign Order # with deactivated passenger	Rider profile is inactive.	Leave it unassigned, tell your lead.

Vehicle #NNN is on break	Driver at lunch.	Wait or use another van.
Trip stays UA after picking the van	Route window starts after the pick-up, or van can't carry that mode.	Set the window first; check the van.
"Route will be changed... Proceed?" hangs	Editing an assigned trip's time.	Unassign, edit, reassign.
Pre-Assign is closed! Empty Pre-Assign...	Green check on a pre-assign with no trips.	It was deleted. Recreate it; next time leave with the back arrow.

Every RouteGenie page

The full left menu, page by page. **Bold** = pages a dispatcher uses every day. The rest are admin, billing or setup pages: look, but don't change anything there.

MENU	PAGE	WHAT IT IS
Dashboard	Dashboard	Summary of the day.
Dispatching	**Dispatching**	Today's board: map, vans, today's trips.
Orders	**Today's Orders**	Today's trips as a list, with Add Order and Assign buttons.
	Reservations	Every trip on any date. Search, filter, export to Excel, activate will calls.
	Trip Import	Upload trip files from the payers.
	Facilities	Saved clinics, hospitals, dialysis centers (name, address, county). Add Facility.
	Visits	Visits with Assign, Schedule, Unassign, Cancel, Complete buttons.
Scheduling	**Pre-Assign Modes**	Build tomorrow's routes.
	Master Pre-Assign	All future pre-assigns in one list, by name and date (e.g. SDVA Slot 1 WC 10/19/2026).
	Driver Shifts	Every van's shift by weekday.

	Shift import	Upload shifts from a spreadsheet (Download template first). Shows past imports and errors.
	Routes	Routes and route legs: date, name, kind, orders, vehicle, driver, assistant, attendant.
Vehicles	**Vehicles**	Every van: mode, status, make, model, plate.
	Car Wash	Car wash records.
	External Vehicles	Vehicles from partner companies.
	Maintenance	Van status and the driver app version on each van (136 vehicles).
	Base Locations	The yards (20, active and inactive).
Users	**Users**	Every driver and office user: username, name, status, role. New Message sends a message to the selected users.
	External Users	Users from partner companies.
	Payroll	Driver payroll in RouteGenie (we use Paycom for pay).
	Driver Groups	Groups of drivers (15), used by the Driver Group filter on the board.
Passengers	**Passengers**	Rider profiles: name, phone, status. Add Passenger, New Message.
	Passenger Experience	Complaints and concerns by order ID and category (Need attention, Archive, Resolved). Add New Concern.
	Eligibility Import	Upload rider eligibility lists from a payer.
Payers	**Payers**	The 39 payer accounts with type, contact, balance and status.
	Billing	Invoices (billing team).
	Invoice Items	Prices and billing items.

	Billing Import	Upload billing files.
	Payer Types	Groups of payers.
Reports	**Reports**	Build and download reports.
Settings	Main settings, Brokers settings, Language settings, Duration Zones, Payments, transit pages	Company setup. Admin only.

The icons along the top bar

- **Bell: Notifications feed**. Pick a kind: Login, Passenger requests, Broker, Order (All, Same Day, API orders, Facility Portal Updates, Standing Order Expirations, Failed API Orders) and Expirations (Driver, Vehicle, Authorization). Check Same Day and Failed API Orders during the day.
- **Communication Center**: messages sent from RouteGenie (Sent, Draft, Other), with date, author, subject and recipients.
- **Chat**: message office employees, drivers or payers inside RouteGenie.
- NEMT news, FREE Live Training, Screen share (for RouteGenie support), and your user menu: Main Menu Version, User Interface Color (Dark / White), Map Color, **Sign Out**.

Phone calls: "Where is my ride?" (ETA)

The most common call. The goal is a true arrival time, not a guess. Sol's own documents for each call type are in SOL DOCS.

1. Ask for the **rider's name**. If the caller isn't the rider, ask their name and where they call from (PACE, VA, a clinic, Lyft...).
2. Find the trip in RouteGenie: search the rider's name on the Dispatching board, then try the address.
3. Not on the board? Check **Reservations**: the trip may have been cancelled or marked no show. Read the notes for the reason.
4. Not anywhere = we don't have that trip today. PACE participants call PACE to book it, or transfer them to (619) 677-3800 option 2 or (619) 591-1180. VA riders: transfer to (858) 552-7575 option 2 so the VA sends us the request.
5. Found it? Note the **driver** and the **van number**.
6. On the map, type the van number in the search box. The map jumps to the van. Click the van icon to see its ETA to the pick-up.
7. Does the ETA make sense? If yes, give it to the caller. If not (it says 30 minutes but the van is around the corner), ask the dispatcher for that account before you answer.

8. If the map shows the van already at the pick-up, call the driver on the radio: are they there, can they find the rider? If the driver is at the door, tell the caller the driver has arrived.

9. If the driver can't find the place, confirm the **pick-up address** with the caller. Sometimes the address in the system is wrong or missing an apartment number.

Phone calls: activating a return (will call)

Many return trips sit as **WC (Will Call)** until someone calls to say the rider is ready. "Activating" the trip means giving it a time so a driver can go. Calls come from riders, hospitals, clinics, the VA, PACE, Lyft and transportation offices.

1. Write down: **who is calling and from where**, the **rider's name**, **what time they will be ready**, and **where they will wait** (lobby, 3rd floor, main entrance).

2. **VA:** ask the veteran to wait in the **main lobby**. It's easier for the driver, and the dispatch office (Carlos) is there. For **gurney** or **7115C** (companion) trips the crew goes inside, so also ask the exact area (e.g. 5 North ASU), whether they need a wheelchair, and the exact ready time.

3. **PACE:** the return is usually already scheduled. If they call early (at 8 for a 9:00 return), say we will come at the scheduled time and will be glad to come earlier if we can.

4. Add a note in RouteGenie. **PACE 250S: in both Notes and Dispatcher Notes. Other accounts: Dispatcher Notes only.** Example: `10:30am inbound call from Sara at PACE to inform ptt John Smith is ready now 10:30 and will be waiting at lobby, ETA provided as per dispatcher 11:00am`

5. Tell the dispatcher for that account. Example: "Hi Ivan, John Smith is ready. He's scheduled for 11:00 — in case we can get there earlier. Thanks."

6. The dispatcher (or you, if asked) gives the return its time in Reservations (see Activate a will call).

Phone calls: same-day add-ons (VA)

A new trip for today. Usually the VA Transportation office calls or emails first, then sends the request in VetRide.

1. Confirm who is calling: their name, and that they are from the VA.

2. Take the trip: **veteran's name**, **mode** (WC, ambulatory, gurney), **pick-up and drop-off** address or area (San Diego, Escondido...), and the **time requested**.

3. Ask the VA dispatcher on shift (RingCentral chat or radio) if we can do it at that time. If they ask about an ETA by phone or email, the VA dispatcher gives it.

4. Tell the caller what the dispatcher said. If we can do it, ask them to **email the request** (it is a same-day add-on) and to **add it in VetRide**.

5. Watch the email and answer it to confirm the trip. Check VetRide to make sure the trip was added.

6. When it shows in VetRide, enter the order in RouteGenie (Creating an order), tell the VA dispatcher, and add a Dispatcher Note, e.g. `Same day add-on PU confirmed between 14:00-14:30`.

Phone calls: driving reports and complaints

Someone reports how a driver was driving

Not common. The caller may be a client or anyone on the road.

1. Listen without interrupting. Show empathy and apologize for the experience.

2. Find out if they are a client. Write down: their **name**, the **approximate time**, the **street or area**, the **van number** or a description of the van, and **exactly what happened** ("The driver cut me off while I was driving").

3. Thank them and say the report will be reviewed with the driver: "Thank you for reporting this to us. We will review the situation and provide feedback to the driver."

4. Send the report to the dispatcher for that account or the Dispatch Manager (Erick), and log it in the Employee Resources Hub if your lead asks.

A client complains

Usual reasons: we were late to one or more pick-ups, the rider missed an appointment because we were late, or the client is unhappy with a driver's attitude.

> **NEVER ARGUE OR BLAME THE DRIVER**
> Your job on the call is to listen, apologize and report.

1. Let the caller explain everything without interrupting.

2. Write down: the **caller's name**, **which trip** (today's, the last one...), and **what happened**.

3. Apologize and show it matters: "We apologize for the inconvenience and thank you for letting us know."

4. Thank them and say the report will be reviewed so we can improve.

5. After the call, send everything on RingCentral to the **dispatcher for that account** or the **Dispatch Manager (Erick)**.

No Show policy

A trip is a **No Show** when:

- It is cancelled **less than 2 hours** before the scheduled pick-up time.
- The driver arrives and the rider **cancels at the door**.
- The driver arrives and knocks, we call the rider with no answer, the driver **waits 15 minutes** (our wait-time policy), and the rider doesn't come out or isn't ready.

ALWAYS
Leave a note in RouteGenie saying why the trip was marked No Show, and tell the dispatcher for that account.

Your dispatch shift, start to finish

The RouteGenie chapter shows which buttons to press. This chapter covers the decisions: what to check, what comes first, and who to tell. When a rule here and your lead disagree, your lead wins.

When you start

1. **Clock in** (Homebase → Time Clock) and set RingCentral to **Available**.
2. **Sign in** to RouteGenie, Paycom, RingCentral, Teams and the mailboxes. Paycom always logs you out 24 hours after sign-in, so sign in again every shift.
3. **Read everything since last night:** every RingCentral chat, the Teams chat with St. Paul's, the mailboxes and the last shift's EOSR. Look for call-outs, van swaps ("Unit Replacement Notice"), trainees, new isolation lists and trips that changed.
4. **Ask which vans carry bedbug spray today.** It changes from day to day.
5. **Look over the board:** timed trips still unassigned, pick-ups RouteGenie shows more than 30 minutes late, duplicate trips, and drivers on a different van than the start-time sheet says.
6. **Check clock-ins** against the posted start times, about 10 minutes after each wave of starts. If the driver has no punch but is already running trips in RouteGenie, the punch is missing (look for a pending punch request). If there is no punch and the driver isn't in RouteGenie, it may be a no-show: tell your lead and Schedulers right away.

All shift long

- **Re-check right before every move.** Other dispatchers assign trips on the same board at the same time. A driver who looks "clear" may already have a trip. Search the trip again right before you assign it.
- **Outside appointments come first.** For St. Paul's that means trip purpose `Outside Appointment`. Dialysis, Glenner, outings and therapy are separate purposes. FHC has no

purpose field: any drop-off that isn't the center (3420 College Ave) is outside.

- **Who covers an open trip:** an idle driver from the same program first. For St. Paul's, use St. Paul's drivers before FHC drivers, and use FHC drivers only if FHC stays covered. Different programs can be back-to-back on one van, but never on board together (see Program rules).
- **After assigning:** right-click → Change Status → **Assigned** so you don't wait for the driver to accept. The new trip lands at the **end** of the route, so fix the stop order. Wait a few seconds before assigning a second trip to the same van, then check that both stuck.
- **Never re-save the stop order of a van that is already en route or loaded** (IR / LO). Saving resets the trip in progress, and the driver has to tap "en route" again. Only move stops that come after the current one.
- **Plan lunches** before each driver's 5th hour (see Lunches during the day).
- **Returns from outside appointments** can wait when the program says so. Go by what the program says, not by the clock.

When you finish

- Write the End-of-Shift Report and send it to the Dispatch mailbox.
- Tell the next dispatcher what is still open: trips that are uncovered, drivers who are late or out, and anything you promised a program.
- Make sure management knows about any unresolved coverage issue before you clock out (see Coverage procedures).

When things go wrong

The situations that come up most often, and what we do. Anything that cancels a trip or changes a driver's day is your lead's call: bring them the facts and a suggestion.

SITUATION	WHAT WE DO
Driver running late	Try to give the trip to a driver who can make it on time, outside appointments first. If nobody can, leave it and tell the program: St. Paul's by Teams ("Sol Dispatch Center / St Paul's Seniors") or phone, FHC by phone. Ask your lead before you message a program. Log late drivers in the Employee Resources Hub.
Driver calls out or doesn't show	Tell your lead and Schedulers. If a spare driver is available, give them the whole route as it is, so no one else's start time changes. Otherwise split the trips. Use wheelchair drivers first. An SDVA gurney crew with no gurney trips to cover can also help with wheelchair trips.
Incident / 911 (a fall, a participant on the floor, an accident)	Stop giving that driver trips until their incident report is done. Don't touch the trip already on board. Tell your lead right away. Incidents are often reported in the St Paul's / FHC chat ("240 is calling 911"). The report goes with your EOSR.

Outbound (A) leg was a No Show	Don't activate or assign the return. It gets cancelled. Add a Dispatching Note first ("A leg no show - return cancelled"), and let your lead do the cancel unless they've told you to.
Bedbug (BB) or isolation (ISO) participant	Always rides alone. A BB participant only rides in a van that carries bedbug spray. Before assigning any St. Paul's trip, read the notes for "bed bug" / "isolation". The note says `NO RIDE SHARE – CLEAN VAN AFTER DROP-OFF`.
Participant traveling with a spouse or companion	No shared ride. The companion takes a seat, so count them.
Methadone trip	The same driver does the return. The participant is only at the clinic a short time.
MTS Access transfer point (NCTD)	Be on time and never leave the rider alone at the transfer point.
A trip you assigned is unassigned again	Open the order → **History** tab to see who changed it and when. St. Paul's re-editing a trip can put the blue dot back and unassign it. Reassign it, and re-apply the time rule if needed.
"Vehicle #... is on break"	The driver is at lunch. Wait, or use another van.
"Unable to assign ... deactivated passenger"	Leave it unassigned and tell your lead. Don't reactivate riders.
A van breaks down or goes to the shop	Tell your lead and the road supervisor. The replacement van has to come from the **driver's own yard**. Samsara shows where the vans really are.

Lunches during the day

The meal rule is in Meal and overtime rules. This section covers how to fit lunches into the day.

- **The 5th hour:** clock-in + 5:00. The 30-minute lunch must start **before** it. Clock in 6:10 → lunch out at **11:09 at the latest**. A lunch out at 11:10 is already in the 5th hour, which means CMP. Plan it with some margin. Use the real clock-in from Paycom. The route start in RouteGenie can be 5–10 minutes off.
- **Where lunches fit:** while the driver waits at an outside appointment for the return, or in a real gap between trips. A driver can't take lunch with a rider on board.
- **Going past the 5th hour** is only for when nothing else covers a trip. Each late lunch costs an extra hour of pay (CMP) and needs a timecard note.

- **Midday lunch check:** post who is still missing lunch, one line per driver with their 5th hour, sorted by 5th hour. St. Paul's + FHC go in the ST PAULS PACE / FAMILY HEALTH chat ("drivers missing lunch:"), NCTD in DISPATCH TEAM. Re-check right before posting if your data is more than 10 minutes old.
- **Saturdays (San Diego):** every driver gets a 1-hour lunch, and nobody goes past 8 worked hours.

WHY IT MATTERS

From May 3 to October 2, 2026, drivers worked 13,833 overtime hours, about 16% of all hours, or roughly 16 full-time drivers. Most of it happens 1–2 PM and 4–6 PM. Lunches planned early and afternoon trips given to later starters are the two things that cut it.

Slots, start times and yards

Every driver works a **slot** (a start window). Tomorrow's start times are worked out from the plan and posted as a sheet for the Schedulers. You'll read these sheets every day and sometimes fix them.

Slot windows

PROGRAM	SLOT 1	SLOT 2	SLOT 3	SLOT 4 / OTHER
250S St. Paul's	4:00–7:00	7:00–10:00	10:00–13:00	–
SDVA wheelchair	3:00–6:00	6:00–9:00	9:00–12:00	12:00–14:00; part-timers later
SDVA gurney	3:00–6:00	6:00–9:00	9:00–12:00 (afternoon/evening crews)	Night crew: Mon–Fri nights
LBVA	From about 3:00, as routed	6:00–9:00, the earlier the better	Everyone at 9:00	Slot 4: afternoon, as routed. Night crew 8 PM–5 AM
0118 / 806	4:00–7:00	7:00 and later	Ask your lead for the current slot list	

Rules for a driver's start

- **Start inside the slot**, as close to its beginning as you can. Never after the slot ends.

- Up to about **30 minutes before** the slot is OK. More than 30 needs your lead's OK. More than 1 hour, never.
- **Hard start times beat everything.** These drivers can never start earlier, not even by 30 minutes. As of October 2026: Lynneth Tapia 9:00, Greg Cunningham 9:00, Daniel Delong after 9:15, Brian Gill 9:30, Eduardo Castillo 8:00, Kevin Jacobs about 9:00, Kiara Mack 12:00 or later. Ask your lead for the current list.
- **St. Paul's slot 1 must start between 4:00 and 7:00.** If PACE has no early trip for them, give them an early VA or FHC trip first, but only if they go straight into their PACE trips afterward (idle no more than 1 hour).
- When a new trip comes in after the sheet is posted, try to fit it in without moving anyone. If nothing fits, move one start, and say so.

How a start time is worked out

THE FORMULA

Start = first pick-up – drive time from the driver's yard – 15 minutes (vehicle inspection), rounded DOWN to the nearest 5 minutes.

Example: first pick-up 7:40, 22 minutes from the yard → 7:40 – 0:37 = 7:03 → start **7:00**.

If the first pick-up is at the yard itself, only the 15 minutes count.

Yards

YARD	ADDRESS	WHO STARTS THERE
South Yard (E St)	3269 E St, San Diego 92102	St. Paul's, FHC South, some SDVA wheelchair
North Yard (Vista)	2525 Ramona Dr, Vista 92084	NCTD and FHC North (north drivers)
Spring Valley	8936 Troy St, Spring Valley 91977	Most SDVA wheelchair drivers and gurney crews
Stanton Yard	8341 Monroe Ave, Stanton 90680	LBVA wheelchair drivers without a take-home van
LBVA (VA Long Beach)	5901 E 7th St, Long Beach 90822	LBVA gurney crews
Driver's home	–	LBVA drivers with take-home vans

- **Drivers keep their own yard.** South Yard and Spring Valley drivers never start at Vista. When a driver needs a van, pick a free one from **their** yard.
- When two drivers swap vans, each driver still starts from their own yard. A van swap doesn't move anyone to another yard.
- When a van moves to another yard, its Base Location in RouteGenie has to change too (see Vehicles and yards).

The start-time sheets

- One file per program: `St Paul's / FHC / NCTD FHC North / SDVA / LBVA Drivers Start Times MM-DD-YYYY.xlsx`. Each driver goes on their **home program's** file with all their trips, even trips for another program.
- **Who gets them:** St. Paul's, FHC and NCTD go to **Schedulers**. SDVA and LBVA go to **Erick's DM and Schedulers**.
- Post **the file only**: no text and no @tags unless your lead asks for them. Don't put your lead's name in the sheet's notes.
- Changes after posting: send the file again with "(Updated)" in the name and the changed rows in yellow. If you only added one trip or crew, send just that tab.

Crews, trainees, night crew and outside companies

Gurney crews

- A gurney (stretcher) trip **always needs 2 people**. If a partner is off, the leftover crew members get re-paired. Never send a gurney out with one person. A gurney driver alone can only do wheelchair or ambulatory trips.
- **Bariatric** gurney riders (over 350 lb) need **3 people**. Either the crew has a third person (in the **Attendant** box), or a wheelchair driver or second crew helps on a payer-100 helper copy (right-click → **Send 2 man**). Confirm who helps.
- A gurney van never carries wheelchair riders while a stretcher rider is on board, and gurney trips are never shared.
- Gurney trips get covered first. When an **SDVA gurney crew has no gurney trips to cover**, it can do wheelchair trips for **any San Diego program** (St. Paul's, FHC, NCTD or SDVA). Keep those to **local** trips. Far wheelchair trips go to wheelchair drivers.

Trainees

- A trainee rides with their mentor and goes in the route's **Assistant** box (a 3rd person on a gurney crew goes in **Attendant**). They have the same start time as the mentor.
- Watch for cutoffs in the clearance email ("must be off by 2:30 PM") and tell your lead if the mentor's route runs past it.
- Who is cleared to drive alone comes from Bailey (PACE / NCTD) and Marilynn (VA) emails.

Night crews

- **SDVA night crew:** two drivers, each can do wheelchair trips alone, and a gurney trip needs both of them in the gurney van. They start about 7:45 PM and cover the early-morning wave.
- They are **not** put in pre-assigns. Their trips get a Dispatching Note: `FOR NIGHT DRIVER <NAME>`.
- **LBVA night crew:** one gurney crew, 8 PM–5 AM.
- Night crews work **Monday–Friday nights only**, so there is **no night crew on Saturday or Monday mornings**. Day drivers cover the early wave on those days.

Outside companies (Long Beach only)

- **MedCare** takes LBVA **gurney (7117)** trips that are **wait-and-return** or **not dialysis**. Dialysis veterans stay with Sol. Keep round trips together: both legs go to Sol or both go to MedCare. The LBVA dispatcher sends MedCare the list in the afternoon. The ones MedCare can't take come back to us, and the rest are cancelled with "MEDCARE TRIPS". Each MedCare leg gets a `MEDCARE` Dispatching Note.
- **KCA** takes far High Desert **wheelchair (7118)** trips (Barstow, Hesperia, Victorville and nearby).
- **San Diego has no outside company.** Every SDVA trip is ours: cover far trips first, then fill in local ones around them. Imperial / El Centro / Calexico trips must always be covered, even if it means leaving a local trip open.
- A crew sent out of state that day gets no local trips.

Who to tell, and where

WHERE	WHAT GOES THERE
RingCentral **Schedulers**	Start-time sheets, call-outs, shift questions. The Schedulers send each driver their shift from our sheets.
RingCentral **ST PAULS PACE / FAMILY HEALTH**	Day-to-day coordination for 250S and 806, incident reports, lunch lists, timecard lists (in Spanish).
RingCentral **LONG BEACH VA DISPATCH**	Everything LBVA.
RingCentral **DISPATCH TEAM**	The whole dispatch room, mostly in Spanish. Isolation lists, NCTD lunch lists, van swaps from the shop.
RingCentral DM to **Erick**	SDVA and LBVA start-time sheets, crew questions, decisions.
Teams **"Sol Dispatch Center / St Paul's Seniors"**	St. Paul's staff: duplicates, mode changes, cancellations, extra trips. Their final changes for tomorrow come by **3:15 PM**, so the St. Paul's sheet goes out after that.
Mailboxes	**Pace**: isolation lists, trip lists. **Family**: FHC lists, North County requests. **Dispatch**: EOSRs, hiring and trainee emails, MedCare, NCTD trip files, Unit Replacement Notices (van swaps).
Employee Resources Hub	Driver reports: incidents, late drivers, no call / no show, sick calls.

- **Message tone:** short, friendly, human. Reply in the language the chat already uses. Read the last few messages before you write.

- **Who is working tomorrow** comes from the **Paycom Time-Off Dashboard** and the **schedule PDFs** (Bailey's PACE & NCTD, Marilynn's SDVA, the LBVA schedule). A call-out in a chat only counts for the day it's about.
- **"Tomorrow" in a chat post means the day after it was posted.** A Monday 8 PM post saying "can't start early tomorrow" is about Tuesday, not the day you read it.
- Never post the same message twice. If you're not sure your post went through, check the chat before you send it again.

End-of-Shift Report (EOSR)

Email it to the Dispatch mailbox at the end of every shift. Subject: `EOSR MM/DD/YYYY`. Keep it short and factual, in the past tense: who, what happened, and what we did. Always list **unresolved trips, the actions you took and who in management you notified** (see Coverage procedures).

```
EOSR
Attendance Issues
Call Outs / Tardiness / Absences / Schedule Changes:   <who, when, who covered>
Driver Timesheet Notes            <OT / 5th-hour / meal notes added in Paycom>
Equipment Notes                   <van swaps, shop, radios, batteries>
Route Update Notes                <reroutes, coverage, trips confirmed or
uploaded>
Client Notes                      <calls, ETAs, program-side issues>
Incident / Accident Notes         <incidents; attach the report>
```

- Write **NONE** (or "No significant incidents to report") in empty sections.
- Made-up example: *"Driver X called out 1 hr before his shift, so I split his afternoon between Driver Y and Driver Z."*
- Program-side problems that management should see (a participant never ready, wrong addresses again and again) go in a separate **Daily Operations Issues** email: a numbered list, one line each, saying what happened.

Weekends, Mondays and special days

Saturday

- San Diego runs as **one combined pre-assign per mode**: `SD WC` and `SD GURNEYS`, covering St. Paul's, FHC, NCTD and SDVA together. Only the drivers on that week's schedule PDFs work.
- Coverage runs to about **3 PM**, including SDVA will-call returns. Will calls get activated at the times they were ready last Saturday (never with "Dispatch now" / "Ready now").
- Every San Diego driver gets a **1-hour lunch**, and nobody goes past 8 worked hours.

- **Saturday morning routine (about 7 AM):** (1) review the Dispatching board for call-outs, unassigned timed trips, duplicates, and drivers on a different van than the sheet; (2) check clock-ins against the two posted sheets; (3) build the `Saturday Drivers & Lunches` file for the team.
- LBVA Saturday has one WC and one gurney pre-assign. MedCare gets the usual Saturday split, and gurney will-call returns are covered during the day, not in the pre-assign.

Sunday

- No standing pre-assign. The on-call driver from the SDVA schedule covers what's booked, and the out-of-state rotation driver covers out-of-state trips.

Monday

- **No night crew** (Sunday night is off). Day drivers and slot-1 gurney crews cover the early SDVA and LBVA wave. When the early wave is short, St. Paul's slot-1 drivers can take a 5:00 VA trip if their PACE route stays the same.
- Check Paycom time off and the schedule PDFs. Monday call-outs are often posted on Saturday or Sunday.

Federal holidays

- VA clinics are closed, so VA volume is about half and mostly dialysis. The rosters stay the same. Check time off first.

Late trip files

- A trip that arrives or changes after the routing dispatcher has left must be reviewed right away by the dispatcher on duty. If it can't be covered, notify management immediately. It can't wait for the morning (see Coverage procedures).
- NCTD sends a first file in the early afternoon and the rest **after 5 PM**. FHC North requests come in the afternoon. Before uploading a late file, compare it with the first one so no rider is imported twice. Tell your lead if a rider shows up again with a different time.
- New VA trips and time changes keep arriving all afternoon. Re-check unassigned trips before every sheet goes out.

Mistakes to avoid

Every one of these has happened. They're easy to make and some are hard to undo.

- **The red × in a trip row, or the red CANCEL in the order window, cancels the trip.** Close windows with the × at the top right. The × on a van card **removes the van**.
- **The green check on an empty pre-assign deletes it.** On a pre-assign that isn't finished, it drops every driver who has no trips. Leave with the back arrow until your lead says the day is done.
- Assigning without re-checking: another dispatcher already moved the trip or the driver.

- Applying a chat's "tomorrow" to the wrong day.
- Changing an **NCTD** or **LBVA** pick-up time. Those are not changed, except LBVA's standing dialysis times.
- Sharing a ride with a bedbug or isolation participant, or putting St. Paul's and FHC participants (or NCTD riders and FHC participants) on board together.
- Starting a driver before their hard start time, or after their slot ends.
- Giving a South Yard or Spring Valley driver a Vista van.
- Sending a gurney with one person, or a bariatric gurney with two.
- Trusting RouteGenie's ETA blindly. On long chains it often runs slower than real life. Check the van on the map before you give a caller a time.
- Kicking someone out of a pre-assign without saying so. Click No unless your lead says the work is yours.
- @tagging people on sheet posts, or posting the same message twice.

Paycom pages we use

Everything dispatch needs is under **Time Management** in the top menu. **Bold** = dispatcher pages. The rest belong to HR, payroll or your lead: look, but don't change anything.

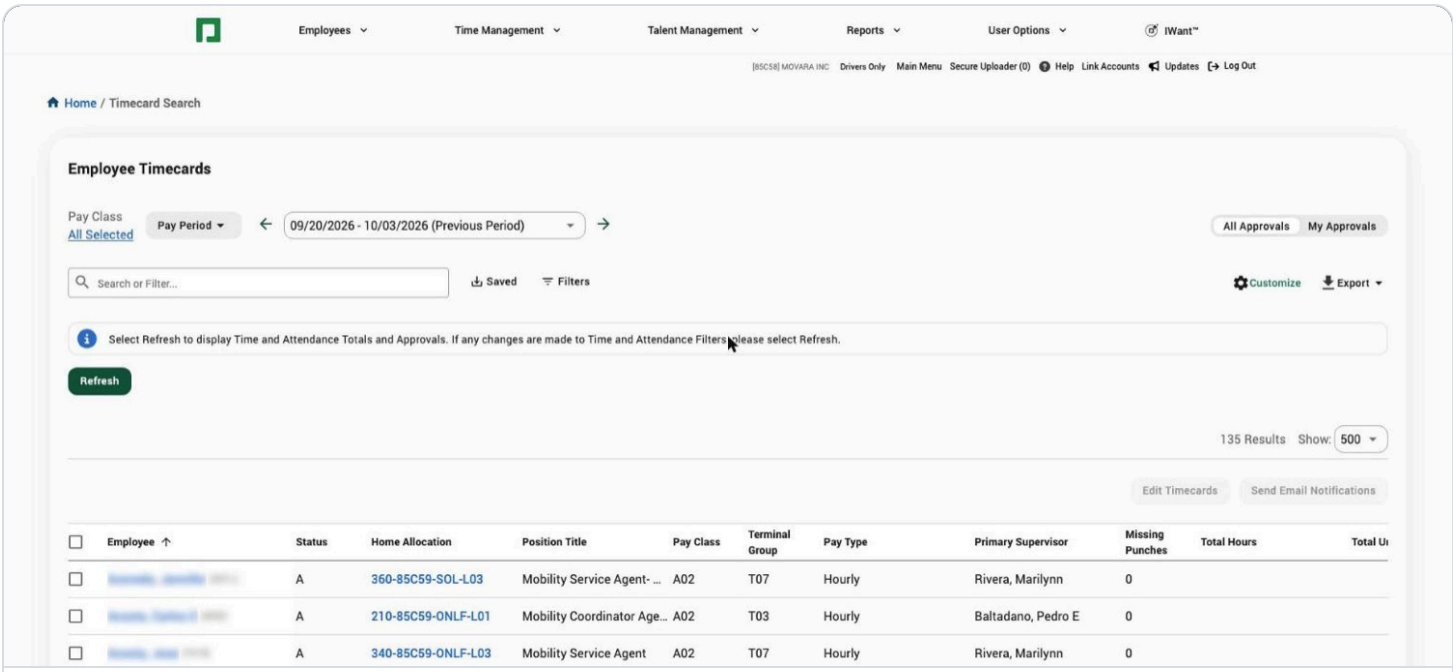

MENU	PAGE	WHAT IT IS
Time Management	**Timecard Search**	Every employee's hours for a pay period; open a timecard from here.
	Timecard Editor	One employee's timecard: punches, notes, exceptions, totals.
	Punch Change Request Dashboard	Punch requests waiting for approval.
Time-Off Requests	**Time-Off Dashboard**	Calendar of requests; click a day to see who is off.
	Time-Off Calendar	Calendar for one department.
	Time-Off Calendar for All Departments	Everyone's time off in one calendar.
	Batch Approve Time-Off Requests	Approve many requests at once. Lead only.
	Holidays and Blackouts	Days nobody can take off. Admin.
	Batch Delete Holidays and Blackout Days	Admin.

Scheduling	**Manage Schedules**	Drivers' shifts by schedule group and day. Add, edit and publish shifts.
	Scheduling Notification Center	Shift Notifications (send shift emails), Notification Templates, Scheduled Notifications, Exception Point Notifications.
	Scheduling Configuration	Schedule groups and shift templates. Admin.
	Schedule Rounding	Rules for rounding punches to the schedule. Admin.
	Labor Budgeting	Labor cost budgets. Admin.
	Import Center	Upload schedules from a file. Admin.

The top bar also shows the company (**[85C58] MOVARA INC**), Main Menu, Help and Log Out.

Paycom: Timecard Search

Paycom is our HR and payroll system (company shown as MOVARA INC). Dispatch uses it to check driver punches, lunches, overtime, punch requests and time off. Look only; add notes only when your lead asks.

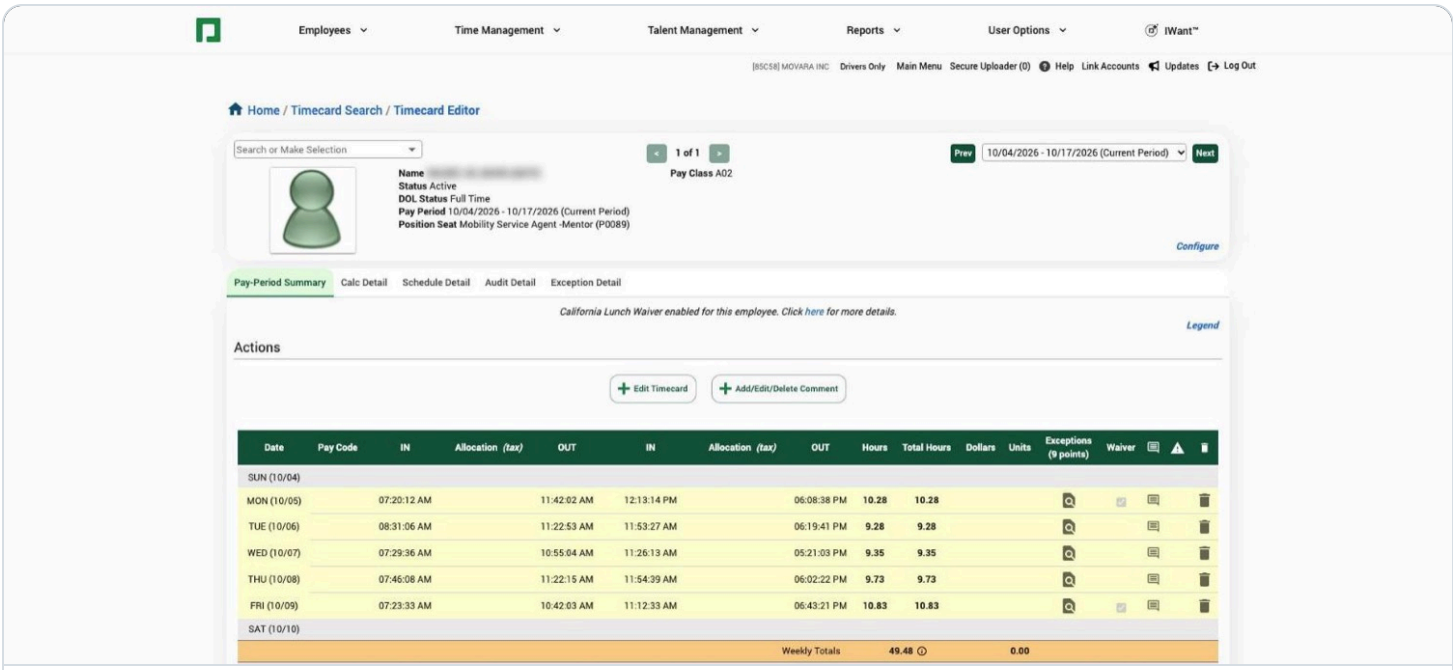

Time Management → Timecard Search. Pick the pay period, click Refresh, search a name. Home Allocation starts with the department number.

Department numbers (Home Allocation)

DEPT	WHO
210	Dispatch and coordinators (office)
250	St. Paul's PACE drivers
806	FHC drivers
310	LBVA gurney crews
320	LBVA wheelchair drivers
330	SDVA wheelchair drivers
340	SDVA gurney crews and night crew
360	NCTD drivers

The code in brackets after a name is the employee's **badge**. A few drivers work a program different from their Paycom department; go by the program they drive.

Reading a timecard

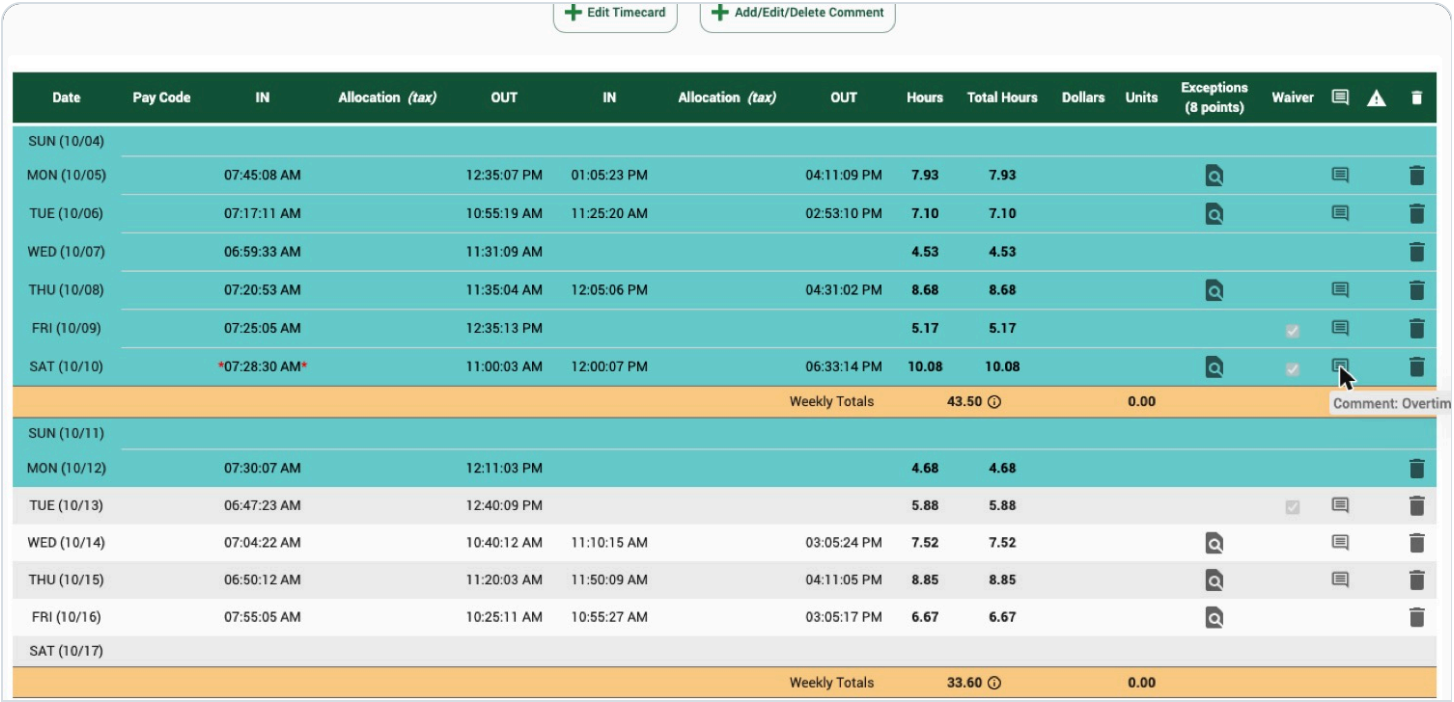

One driver's pay period. Each day: IN (clock in), OUT (lunch out), IN (lunch in), OUT (clock out), Hours. "California Lunch Waiver enabled" shows at the top.

- Punch types: **ID** In Day, **OL** Out Lunch, **IL** In Lunch, **OD** Out Day.

- **Teal rows** are approved by a supervisor: nothing to do. Yellow rows are only approved by the employee.
- The speech-bubble icon = comments on that day. **Add/Edit/Delete Comment** adds a note; only with your lead's OK and wording.
- Never use **Edit Timecard**, the trash icons or Delete Comments.
- Tabs above the grid: **Pay-Period Summary** (the normal view), **Calc Detail** (how hours and overtime were worked out), **Schedule Detail** (the scheduled shift next to the punches), **Audit Detail** (every change to the timecard, who and when) and **Exception Detail** (late, early and missed-meal exceptions).
- Below the grid: **Totals** (hours per pay code, e.g. Regular, Weighted Overtime), **Approvals** (who approved which days) and **Attestations** (the employee's answers when they clock out).
- Columns on the right: **Exceptions** (magnifier opens that day's exceptions), **Waiver** (meal waiver used), speech bubble (notes), warning triangle, trash.

Checking and adding timecard notes

Notes (Paycom calls them comments) explain a late lunch, overtime or a wrong punch so payroll can approve the timecard. Dispatch checks them every day for its drivers.

Date	Pay Code	IN	Allocation *(tax)*	OUT	IN	Allocation *(tax)*	OUT	Hours	Total Hours	Dollars	Units	Exceptions (8 points)	Waiver
SUN (10/04)													
MON (10/05)		07:45:08 AM		12:35:07 PM	01:05:23 PM		04:11:09 PM	7.93	7.93

							Weekly Totals		33.60		0.00		

A timecard. The speech-bubble column shows which days have a note. Hover the bubble to read it (here: "Comment: Overtime..."). The magnifier under Exceptions opens that day's exceptions.

Check the notes

1. Time Management → **Timecard Search**. Pick the pay period and click Refresh.
2. Filter by department (Home Allocation, e.g. 806 for FHC) and open each driver's timecard.

3. Look down the **speech-bubble** column. A bubble = that day has a note. Hover it to read it.
4. Compare with the punches: a lunch that starts at or after the 5th hour needs a meal note (and CMP), more than 9 hours needs an OT note, and a double punch needs a delete note (see Meal and overtime rules).
5. Notes starting "Automated Time-Off" are made by the system. They don't count.
6. Write down the drivers and days that are missing a note and send the list to your lead.

Example of a good OT note we use: `OT / EXTENDED SHIFT TO ASSIST WITH AFTERNOON TRIPS FROM PAYER 806 AND 250S`.

Add a note (only when your lead asks)

1. Open the driver's timecard and click **Add/Edit/Delete Comment** (the button above the punches).
2. The form opens. Check the **date**: it starts on today. For an older day, change it to MM/DD/YYYY.
3. Click inside the comment box, then type the note (255 characters at most). Use your lead's exact wording.
4. Click the green **Add Comments**.
5. Check the bubble now shows on the right day and the punches did not change.

DON'T

Don't click a day's bubble to add a note: that opens the edit form for the existing note. Never press Update Comments or Delete Comments, never tick the boxes next to old comments, never use Edit Timecard or the trash icons. OT notes and meal notes go in **separate** comments.

Yellow rows are approved only by the employee, so you can still add notes. Teal rows are approved by a supervisor and are final.

Meal and overtime rules (California)

- A **30-minute meal** must start **before the end of the 5th hour** of work. Clock in 6:00 → lunch out at **10:59 at the latest**. A lunch out at 11:00 or later is a CMP.
- If the day is **6 hours or less**, the meal can be waived (our drivers have the lunch waiver).
- Over **10 hours** needs a second meal.
- A missed or late meal = **one extra hour of pay** (meal premium; our **CMP** code).

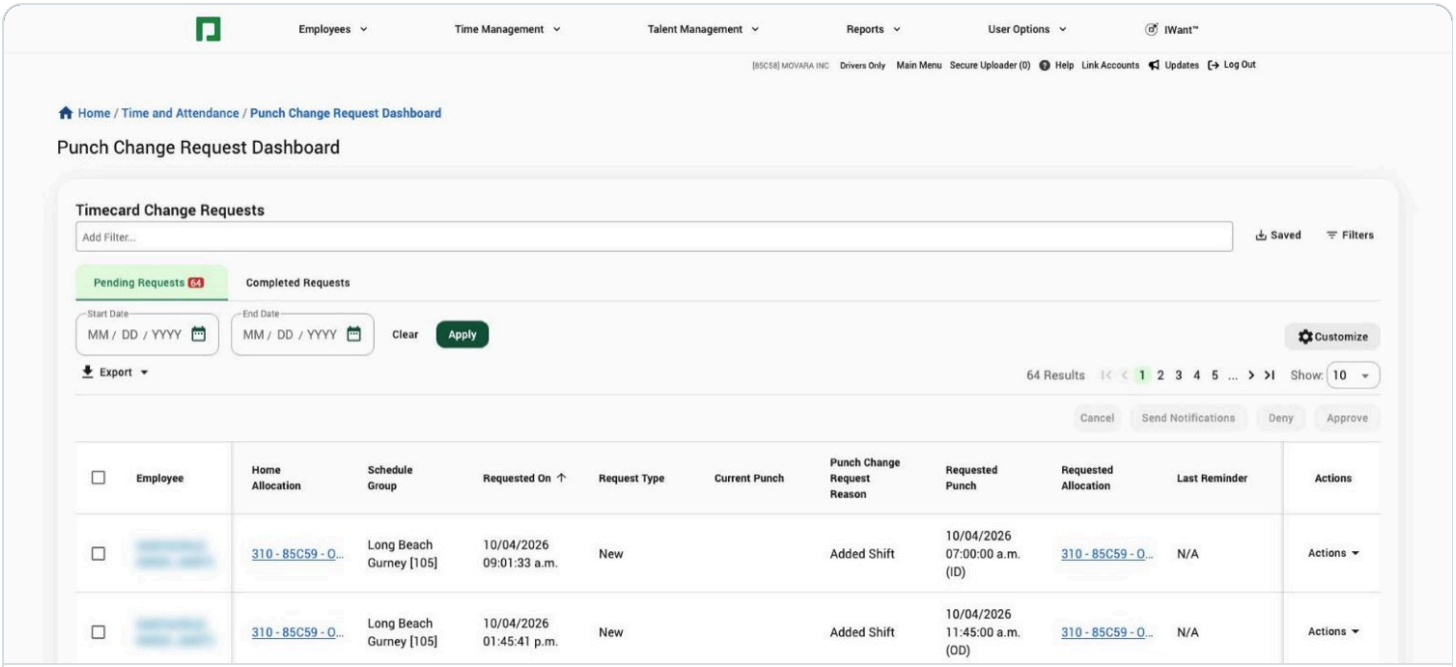

What we flag and the notes we use

FLAG	NOTE WORDING

Lunch started at or after the 5th hour	"Driver passed his 5th hour due to assisting trips due to high volume." + CMP code
More than 9 hours worked	"Overtime due to assisting trips and returns." (separate comment from the meal note)
No lunch and more than 6 hours	Flag to your lead
Double punch	"Please delete the 7:52 AM clock in, correct clock in is 7:00 AM."

During the day: plan each driver's lunch before the end of their 5th hour, ideally while they wait at an outside appointment.

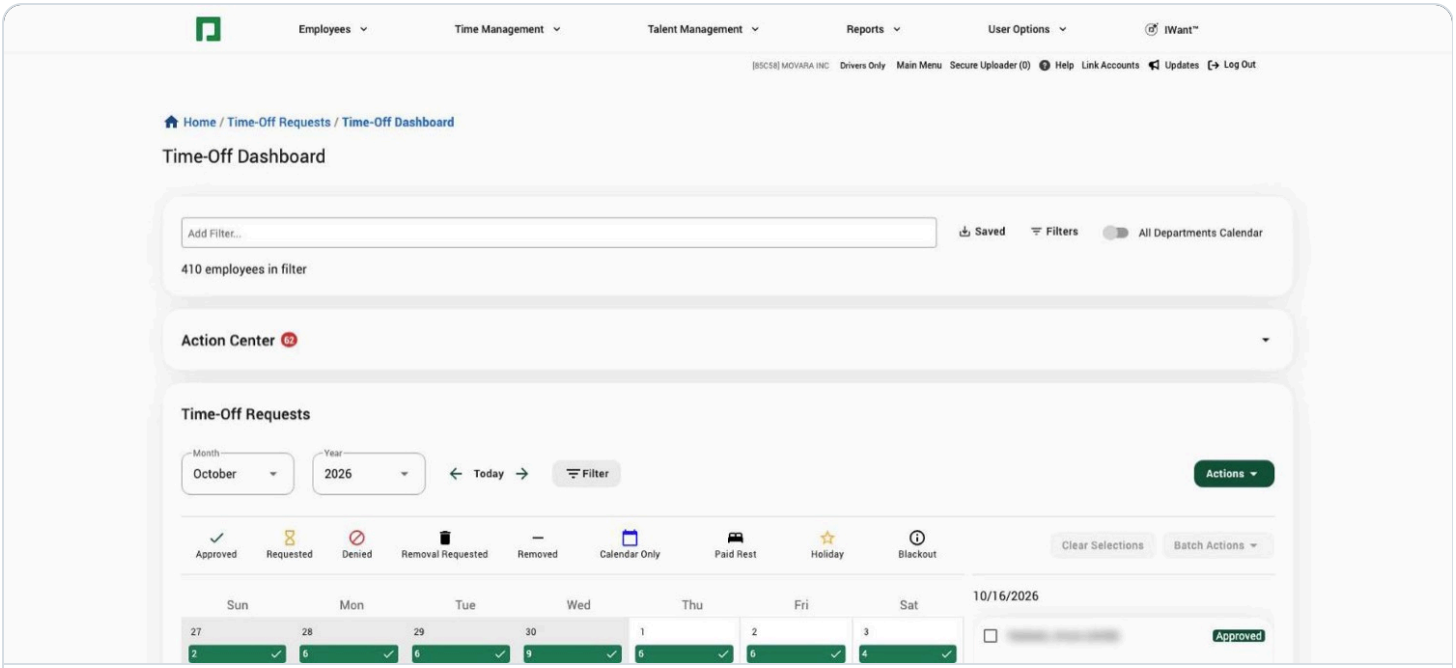

Punch Change Requests (PCR)

Time Management → Punch Change Request Dashboard. Pending Requests (64 here). It shows 10 rows per page: set Show to 100 before you read it.

- Each row: employee, department, date requested, type (New), reason, the requested punch with its type (ID, OL, IL, OD).
- Watch for wrong punch types (an IN requested as OUT) and requests that would make a double punch.
- Approve only the rows your lead names.

Time-Off Dashboard

Time Management → Time-Off Requests → Time-Off Dashboard. The calendar shows how many requests each day; click a day to list who is off (right side).

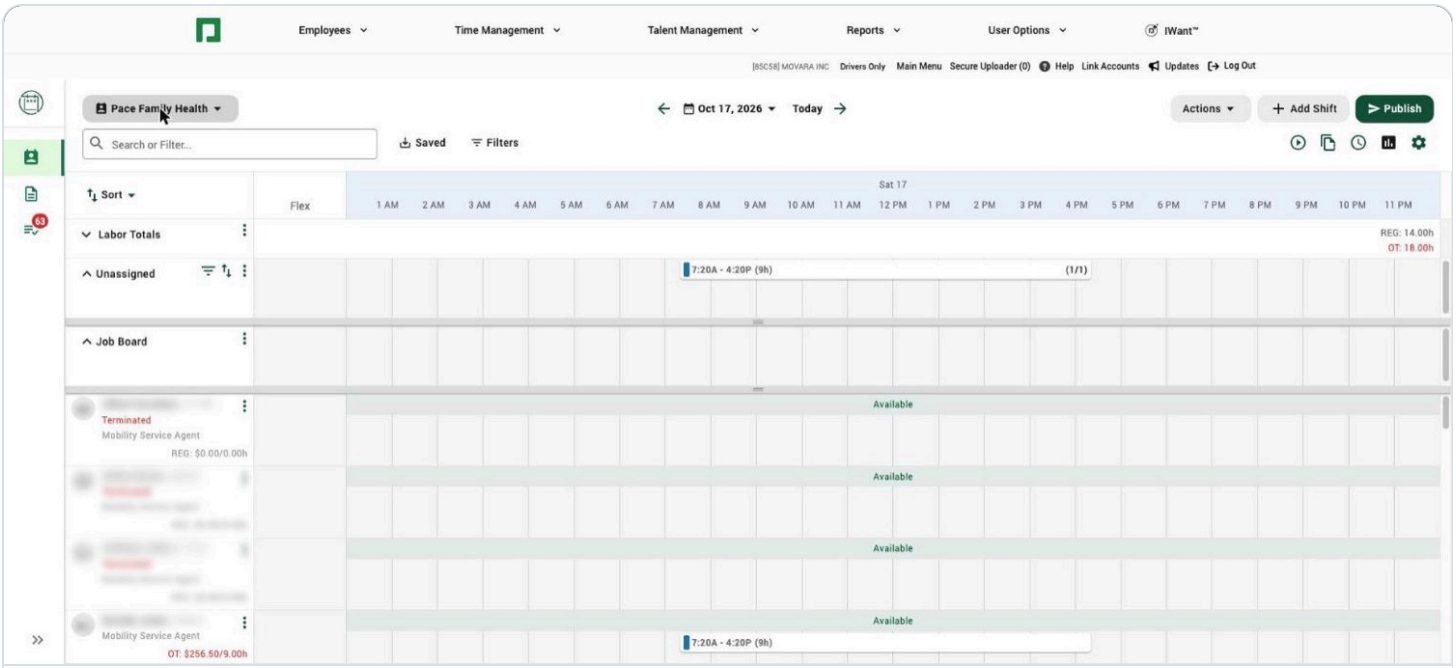

Check tomorrow's day before you build any pre-assign. Green tick = approved, hourglass = requested (pending), red = denied.

SESSION LIMITS

Paycom logs you out after 100 minutes idle and always 24 hours after sign-in. Sign in at the start of your shift.

Paycom: Manage Schedules

Time Management → Scheduling → **Manage Schedules**. This is where the drivers' shifts live in Paycom. Drivers see their published shifts in the Paycom app and clock in against them.

Manage Schedules for one schedule group and one day. Top: group picker, date, Actions, Add Shift, Publish. Rows: Unassigned (open shifts), Job Board, then one row per employee with the week's REG/OT hours. Names are blurred.

Pick a schedule group

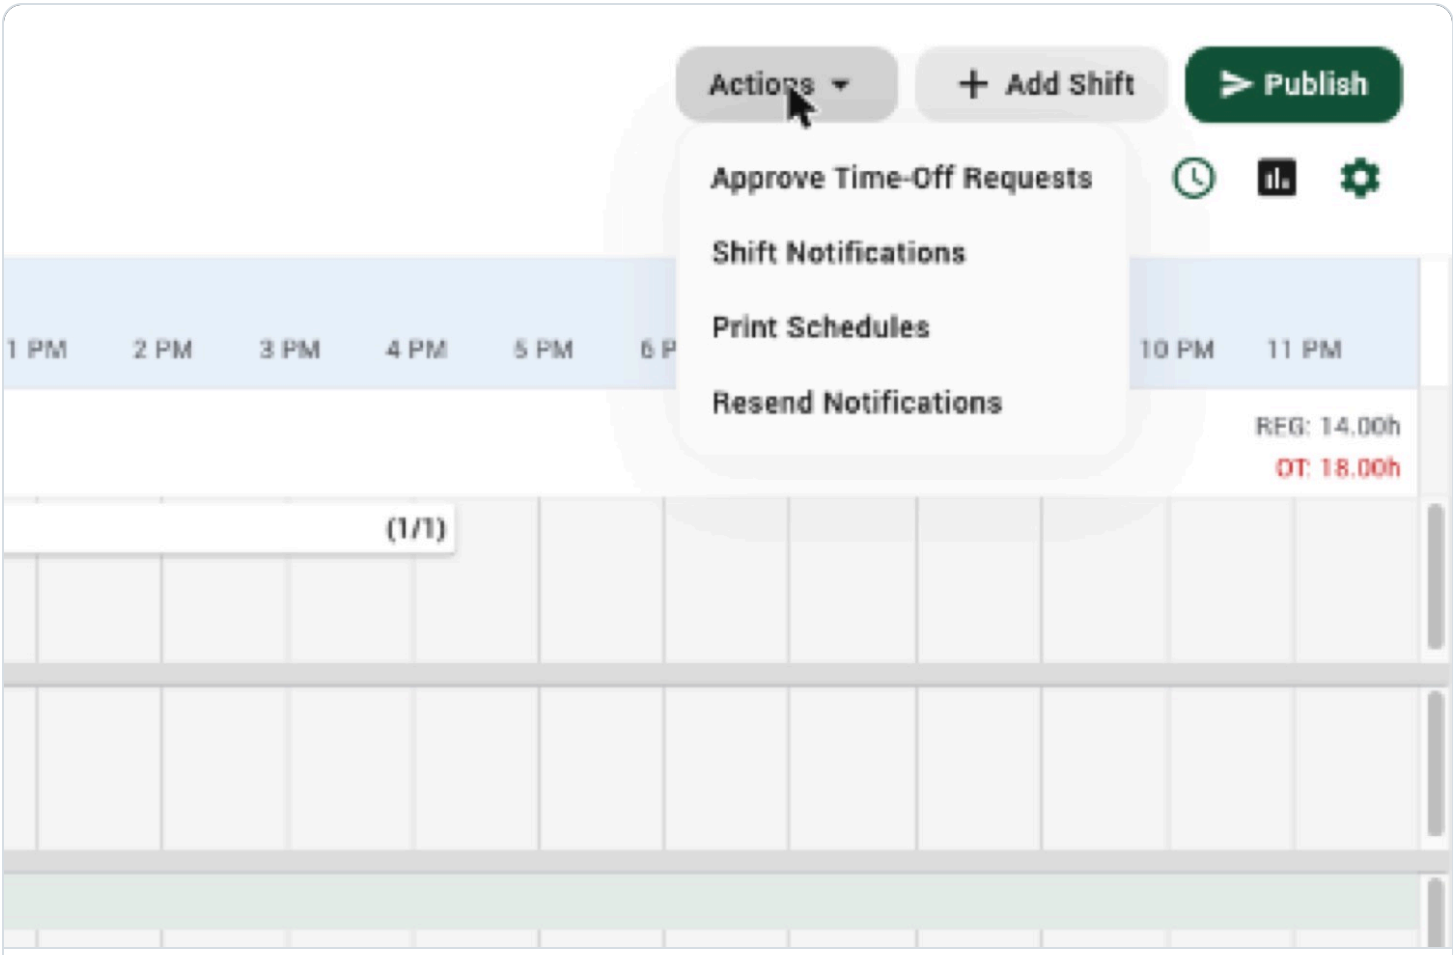

The group button (top left) lists every schedule group and how many employees are in it.

SCHEDULE GROUP	PROGRAM
St. Paul's Pace [101]	St. Paul's PACE (250S)
Pace Family Health [102]	FHC PACE (806)
SDVA Wheelchair/AMBI [103]	SDVA wheelchair (7115)
SDVA Gurney [104]	SDVA gurney (7114)
Long Beach Gurney [105]	LBVA gurney (7117)
Long Beach VA Ambi/ WC [237]	LBVA wheelchair (7118)
NCTD [99]	NCTD (0118)

Dispatch [108]	Dispatch office

What is on the screen

- **Date** with arrows and **Today**. The grid runs from 1 AM to 11 PM; each blue bar is a shift (e.g. `7:20A – 4:20P (9h)`).
- **Unassigned**: shifts with no employee yet. **Job Board**: open shifts offered to employees.
- Each employee row: name and badge, position (Mobility Service Agent), **REG / OT** hours and pay for the week, "Terminated" in red for people who have left. A green "Available" band shows when they are available.
- Click a shift bar to open **Edit Shift**. Hover a bar to see its date, times and comment.
- The ⋮ on an employee row: View Employee Detail, Go to Schedule Detail, Go to Employee Forms.
- Small icons under Publish: **Run Auto-Scheduler** (don't use), **Copy Shifts**, **Clocked In** (who is clocked in now), **Totals**, **Settings**.
- Left rail: Schedules, Schedule Setup, and **Manager Review** (the red number is items waiting for a manager).

The Actions menu: Approve Time-Off Requests, Shift Notifications, Print Schedules, Resend Notifications.

Create a shift and send it

Add Shift

Description

Allocation Manage

Manage Shift Allocations. If none selected, Home Allocation will be used.

Qualifications

Add Shift. Nothing was saved here.

1. In Manage Schedules pick the **schedule group** and the **date**.
2. Click **+ Add Shift**. The Add Shift panel opens on the right.
3. **Description** (optional). The blue button next to it only changes the bar's color.
4. **Start Date**, then **In Time** and **Out Time** (e.g. 07:20 AM to 04:20 PM). The bar shows the length, e.g. (9h).
5. **Recurrence**: Never for a one-day shift. Change it only to repeat the same shift.
6. **Comment**: write the **van and the yard**, e.g. `VEH 265 South Yard`. The comment goes into the shift email the driver gets.
7. **Headcount** 1. Leave **On Call** off.
8. **Allocation**: leave empty and Paycom uses the employee's home department. **Positions**: leave at 0 Selected unless told.
9. **Assignments** → **Employees**: pick the driver. With nobody picked the shift goes to **Unassigned**.
10. **Punches** → **Add Punch**: only if your lead wants a planned lunch on the shift.
11. Click **Save**. To leave without saving, use the × at the top of the panel.
12. **Send it**: publish the schedule, then send the driver the shift email (next section).

PUBLISH AND DELETE

Publish (green, top right) releases the shifts to the employees in the group. Ask your lead before you publish a whole group. Edit Shift also has a **Delete** button: never delete a shift without your lead's OK.

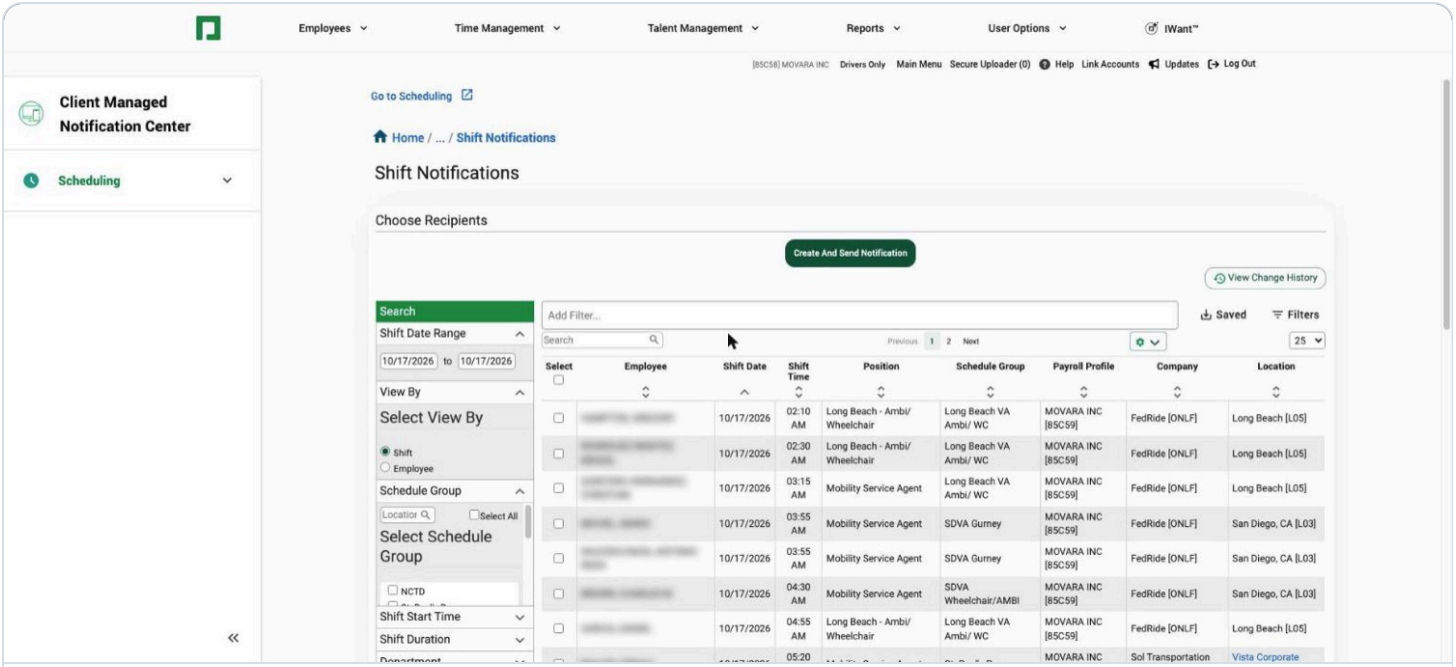

To change a shift, click its bar, change the time or comment in Edit Shift and Save. Then send the driver a notification so they know.

Shift notifications (Scheduling Notification Center)

Drivers get their shift by email or text from Paycom: subject **New Shift Available**, with the date, start and end time and the shift comment (van and yard). Their replies go to dispatch@soltransportation.com.

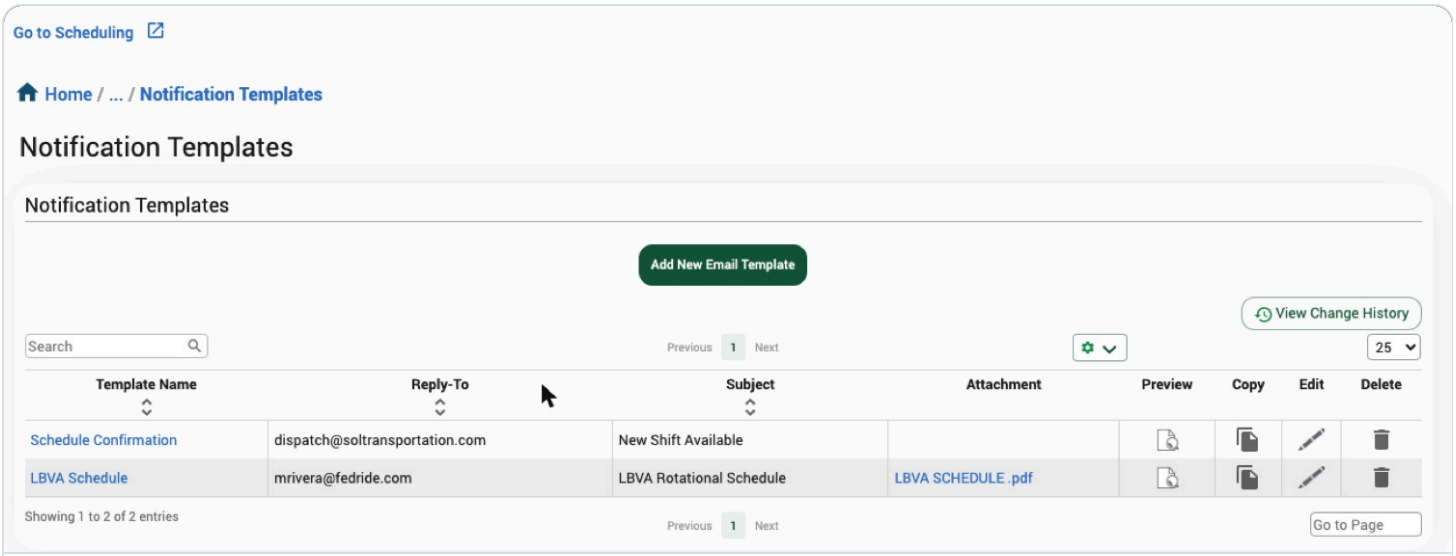

Send from the Notification Center

1. Time Management → Scheduling → **Scheduling Notification Center**.
2. Left side: **Scheduling** → **Shift Notifications**.
3. **Shift Date Range**: the day of the shift (e.g. tomorrow to tomorrow). **View By**: Shift.
4. **Schedule Group**: tick the program (e.g. Pace Family Health). Other filters: Shift Start Time, Shift Duration, Department, Location.
5. In the list, tick **Select** next to each driver's shift. Check the date and time on each row.
6. Click **Create And Send Notification**, choose the **Schedule Confirmation** template, check the message and click **Send**.

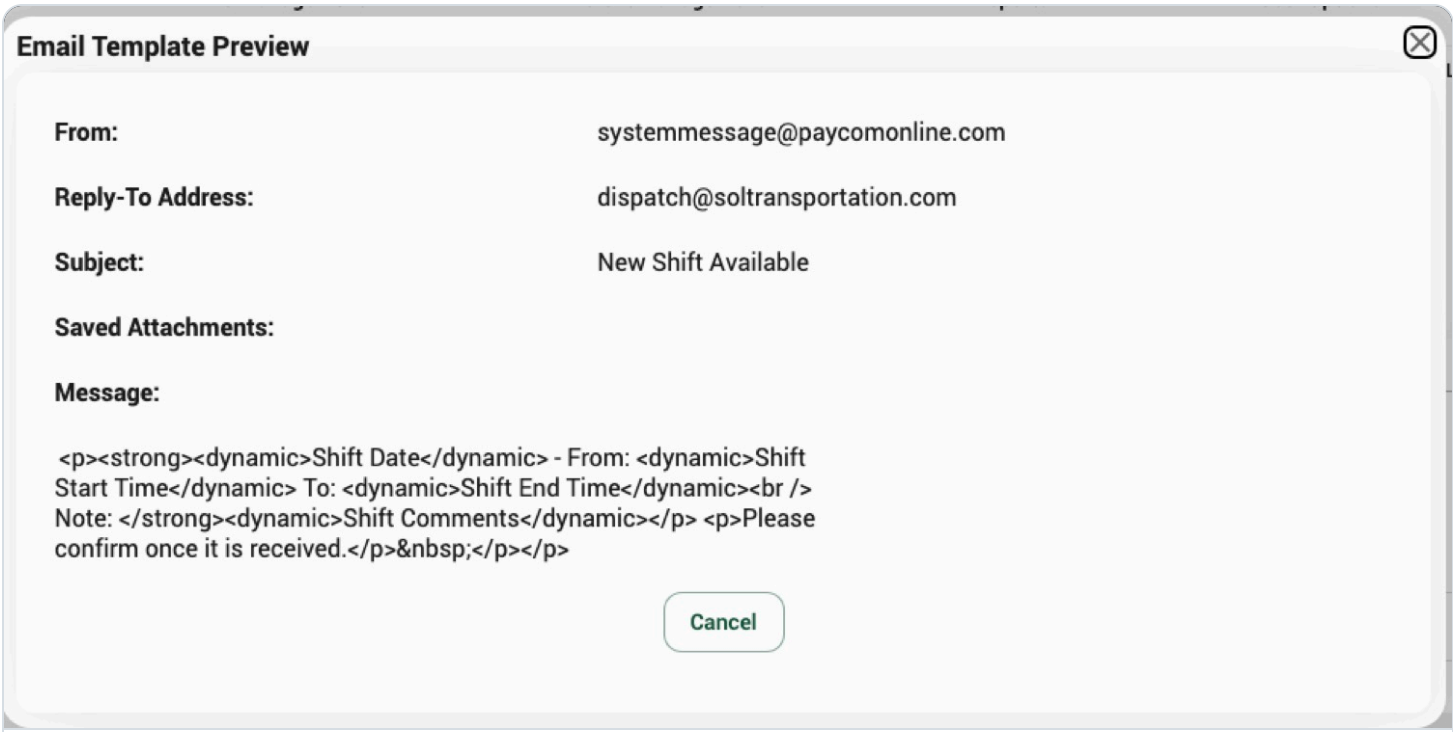

Shift Notifications: filters on the left, every shift in the date range on the right (employee, date, time, position, schedule group, company, location). Names are blurred.

The templates

Notification Templates: Schedule Confirmation (reply-to dispatch@soltransportation.com, subject New Shift Available) and LBVA Schedule (the LBVA rotational schedule with a PDF).

Preview of Schedule Confirmation: shift date, From start time To end time, Note: the shift comment, and "Please confirm once it is received."

Don't edit, copy or delete templates. That is for your lead.

Send from Manage Schedules

- **Actions** → **Shift Notifications** opens **Send Notification**: pick the Employees, type Reply-To, Subject and the message, add attachments if needed, then **Send**. Use it for a one-off message to a few drivers.
- **Actions** → **Resend Notifications** sends the shift notice again to someone who didn't get it.

Send Notification

Message

Reply-To Address

Subject

Send Notification from Manage Schedules. Nothing was sent here.

AFTER SENDING

Drivers reply "received" to dispatch@soltransportation.com. Check the replies, and call any driver who hasn't confirmed by the end of your shift.

Check yourself

Answer each one in your head, then click to see the answer. All trips and riders here are made up.

▼ 1. A St. Paul's blue-dot trip has a 9:30 appointment. What is the pick-up time?

8:30. Appointments after 6:30 get a pick-up 60 minutes before. Appointments at or before 6:30 get 30 minutes before (6:00 → 5:30).

▼ 2. An NCTD rider's pick-up would fit a route better 20 minutes earlier. Can you move it?

No. NCTD pick-up times are never changed. Up to 30 minutes late is OK.

▼ 3. Two St. Paul's participants go to the same center, and one of them is on the bedbug list. Can they share?

No. Bedbug and isolation participants always ride alone, and a bedbug participant only rides in a van that carries bedbug spray.

▼ 4. An FHC van finishes its FHC drops at 8:50. Can it take a St. Paul's trip next?

Yes, back-to-back. Just never with St. Paul's and FHC participants on board at the same time.

▼ 5. A driver clocked in at 6:40. When must their lunch start at the latest?

11:39 at the latest. 6:40 + 5:00 = 11:40 is the 5th hour, and a lunch out at 11:40 is already a CMP. Plan it with some margin. Use the Paycom clock-in, not the RouteGenie route start.

▼ **6. A driver's first pick-up is 8:10 and the drive from their yard is 33 minutes. What is the start time?**

8:10 – 33 – 15 = 7:22, rounded down to **7:20**.

▼ **7. A driver calls 911 for a participant who fell. What do you do with that driver's next trips?**

Stop giving them trips until the incident report is done, don't touch the trip on board, and tell your lead right away. The next trips get covered by other drivers.

▼ **8. A driver is running 25 minutes late to an outside appointment pick-up and nobody nearby is free. What now?**

Leave the trip and tell the program. For St. Paul's that's Teams or phone, for FHC it's phone. Ask your lead before you message the program, and log the late driver.

▼ **9. An SDVA gurney crew has no gurney trips left at 10:00, and there's an open St. Paul's wheelchair trip nearby. Can they take it?**

Yes. When an SDVA gurney crew has no gurney trips to cover, it can do wheelchair trips for any San Diego program: St. Paul's, FHC, NCTD or SDVA. Keep them on local trips. Far wheelchair trips go to wheelchair drivers.

▼ **10. A Long Beach gurney veteran is going to a VA clinic appointment and will need the crew to wait. Who takes it?**

Usually MedCare: wait-and-return and non-dialysis gurney trips go to MedCare. Dialysis veterans stay with Sol. Both legs go to the same company.

▼ **11. An SDVA trip from El Centro looks too far to reach. Leave it open?**

No. San Diego has no outside company, so an open SDVA trip simply isn't covered. Far trips get covered first, and Imperial / El Centro / Calexico trips must always be covered.

▼ **12. It's Monday 7 AM. A Saturday chat post said "Driver X can't come in tomorrow." Is Driver X out today?**

Not because of that post. "Tomorrow" in a Saturday post means Sunday. Check the Paycom Time-Off Dashboard and the schedule PDFs for today.

▼ **13. A rider's outbound trip was a No Show. The rider's family calls to activate the return. What happens?**

The return is not activated. It gets cancelled (your lead's call), with a Dispatching Note explaining why.

▼ **14. You are in a pre-assign with drivers added but no trips yet, and you're done for now. Green check or back arrow?**

Back arrow. The green check on an empty pre-assign deletes it.

▼ **15. Who needs to be on a bariatric gurney trip?**

Three people: a 3-person crew, or a 2-person crew plus a helper (a wheelchair driver or another crew on a payer-100 "Send 2 man" copy).

▼ 16. A South Yard driver's van goes to the shop. The only free van is at Vista. Use it?

No. Drivers keep their own yard, so find a free South Yard van and ask your lead if there isn't one.

▼ 17. An LBVA veteran has a 10:00 appointment at the Long Beach VA, and VetRide shows 85 miles. No time in the notes. What pick-up should the trip have?

7:30. 85 miles is in the LBVA 80–100 row: 2.5 h before the appointment. (For SDVA the same distance would be 3 h.) The processor sets it; you only check it.

▼ 18. An SDVA return trip is picked up at the La Jolla VA. What happens to it in the upload?

It becomes a will call: the veteran calls when ready. Discharges and airport trips are the exception: they are never will calls.

▼ 19. A trip has a 7:45 AM pick-up tomorrow. By when must it be pre-assigned with confirmed coverage?

By 7:30 PM tonight. Every trip at or before 8:00 AM, for every account, must be pre-assigned in RouteGenie with confirmed coverage by 7:30 PM the night before.

▼ 20. The routing dispatcher submitted the schedule at 5:15 PM and told the pre-assignment dispatcher that a 6:30 AM trip has no driver. Is that trip covered?

No. Submitting a schedule or communicating a trip is not confirmed coverage. From the moment the schedule is submitted, the pre-assignment dispatcher owns it: assign and verify it in RouteGenie by 7:30 PM, or notify management immediately if it can't be covered.

▼ 21. A new 6:00 AM trip comes in at 9:00 PM, after the routing dispatcher has left. Can it wait for the morning shift?

No. The dispatcher on duty reviews it right away. If it can't be covered, notify management immediately and document it in the EOSR. It can't be left for the morning without escalation.
